invent

You're at home after a long day at work looking forward to catching the latest Oscar movie. But you're simply too tired to go out to the cinema. Here's how HP helps you do it without leaving the comfort of your plush sofa – The HP Pavilion dv1000 entertainment notebook pc.

25% more pixels

25% sharper image

Starting with our very own HP QuickPlay in every set, you get to enjoy music and movies in 15 secs without standard boot up. Easy to use with dedicated media control keys helps heighten your pleasure without the fuss. With Intervideo Home Theater digital entertainment software, jacks for 2 headphones if you want to share with a friend who's coming over and a wireless headphone option for further convenience if you're alone, HP covers every possible scenario you may enter into, including a remote control so you can flick the pause button when the popcorn runs out. Feel compelled to rock the neighbours with true-to-life sounds? Harmon Kardon speakers packed into this machine do just that with style.

Also, by combining the HP dv1000 with peripherals like the HP iPAQ and HP's Photosmart 945 digital camera and DVD Writer, you get a complete digital entertainment system that is simple to navigate and enjoyable to use. With the Pavilion as your home entertainment hub, you have in one lightweight carry-around box, nothing less than the ultimate experience in digital lifestyle. So, the next time you stop to wonder what life is all about, look to HP Pavilion dv1000 entertainment notebook for an answer.

See more with High Definition Widescreen

One of the most amazing things about watching a movie in a cinema is to be able to take in every detail the filmmaker makes. With wide format 14" LCD display, we give you the depth of a 12″ PC with the viewing width of a 15″ liquid crystal display so it combines more usable screen with less bulkmaking it the ideal portable solution.

Enjoy clearer and sharper visuals

Enjoy natural high definition quality images when watching your favourite movies or even pictures taken from your holiday.

Low definition   High definition

HP Pavilion dv1000 Entertainment Notebook PC

Tune-in to your favourite DVD without standard boot up
Two very useful tools indeed. HP QuickPlay makes playing your digital media a fuss-free joy. With an interface that is simple and clean, it allows you to enjoy digital media without standard boot up. Intervideo Home Theatre plays back movies from multiple sources for total enjoyment.

Reach out, not get up to access media programs
What's the enjoyment if you have to get up from your seat in between watching re-runs to control your notebook? Now it's a breeze to swap between commands using HP mobile remote control from the palm of your hand!

Lightning speed for fast fun
Used to wait long intervals to transfer your large size photos and video? With HP 6-in-1 media reader, you can now easily access and manage your files quickly between any compatible devices. Also, with integrated WiFi, you can now simply power up and hook online just by being "in the area".

Peripheral devices connect with ease with All-in-One Media cable*
Expansion port for All-in-One Media cable allows viewing of all digital media in an easy and convenient manner from whatever source you plug in from. Saves you from nasty surprises and the trouble of excess cables lying around.

### Movies and Music come alive with Harmon Kardon speakers
The hills are alive, with the sound of American sound icon Harmon Kardon. Built into the Pavilion, music and sound that erupt from these speakers will blow you over. Want to share a show with a friend? With dual headphone jacks, you can both plug into a world of your own and let your Pavilion notebook entertain you for hours no end.

Hook-up to full desktop capabilities with Expansion Base xb2000
Want to have notebook mobility, desktop convenience with simple and swift connections? With the height adjustability, improved cable management and more connectivity options, HP expansion base allows you to have a cordless desktop experience.
