UPC Code: 808068-01147-7

**One Cabinet Charges Essentially All Mobile Computing Devices in Use Today**

Aleratec's ChargeCabinet16 has been designed to simplify the purchasing decision for education and business administrators that have multiple device formats, multiple placement challenges and significant budget constraints. Our heavy-duty, commercial quality steel constructed cabinet quickly charges 16 “mix and match” small footprint computing devices, whether Chrombook, Ultrabook, Macbook, tablets, mini-laptops or e-Readers. ChargeCabinet16 comes with a keyed lock, the hardware to bolt in place and accommodates an additional padlock (not included), should you need. Additionally, the cabinet can be stacked, to provide additional capability in space constrained rooms. Passive grab handles provide ease of placement, and movement to new or different locations as needs change. A mounting kit (Aleratec part number 400109 not included) lets users chose to secure their cabinet to a wall when floor space is not available.
