

Wireless Presenter - Nano Receiver

Present like a pro.

K33271WW

Product Description

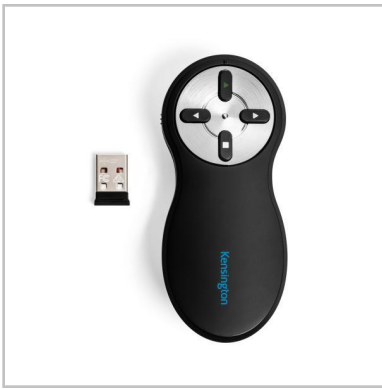

Present like a pro with the Wireless Presenter - Nano Receiver. Designed for professionals, with a reliable wireless connection and natural controls, this remote allows you to focus on making an effective presentation. The intuitive four-button layout lets you easily go forward and back on your PowerPoint or Keynote slides, while the other two buttons let you hide your screen and play a slideshow*. The wireless nano receiver conveniently stores inside the battery compartment when not in use.

Features

- Intuitive four-button layout lets you easily go forward and back on your PowerPoint or Keynote slides, while the other two buttons let you hide your screen and play a PowerPoint slideshow.
- The laser-free design is an ideal solution for locations where laser devices are not permitted.
- Roam the room with ease during your presentation. Plug-and-play 2.4GHz wireless connection with 65-foot range delivers secure, reliable performance through a compact USB receiver. No driver required.
- AES 128-bit encryption, a secure wireless technology adopted by the U.S. government as the encryption standard, protects sensitive data from potential hackers.
- Battery compartment also provides a handy internal storage space for the wireless USB nano receiver when not in use. Each receiver and presenter are uniquely paired to prevent interference.
- On/off switch lets you turn the presenter off to conserve battery power when not in use.
