Unpack

**1** Make sure you have these items:

Note: Do not open ink cartridge packages until you are ready to install the ink. Cartridges are vacuum packed to maintain reliability.
**2** Remove all the packaging materials and tape.

3 Open the top cover and remove any tape inside.

**4** Open the front cover and remove the transportation locks.

Tip: Keep the transportation locks in the accessories box. You can also use the accessories box to store your printer manual and spare ink cartridges.
Turn on and configure

1 Connect the power cable.

Caution: Do not connect to your computer yet.

**2** Press the ⏻ power button and adjust the control panel.
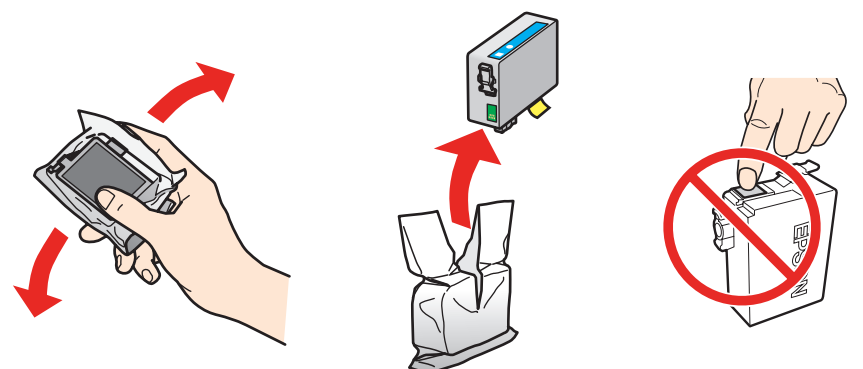

3 Select your language.

Install ink cartridges

**1** Open the printer cover, then open the ink cartridge cover.

**2** Shake the ink cartridges gently 4 or 5 times, then unpack them.

**3**   Remove only the yellow tape from each cartridge.

**Caution:** Don't remove any other seals or the cartridges may leak.

4   Insert the cartridges in the holder for each color.

5   Press the cartridges down until they click.

6   Close the cartridge cover, then close the printer cover.

7   The printer begins priming the ink delivery system. This takes about 10 minutes. Do not turn off the printer, load paper, or open any covers until the process is complete.

Note:
- The printer is designed for use with Epson® cartridges only, not third-party cartridges or ink.
- The cartridges included with the printer are designed for printer setup and not for resale. After some ink is used for priming, the rest is available for printing.
**Caution:** Don't turn off the printer while it is priming or you'll waste ink.
