

New NetShelter CX Mini (AR4000MVA)

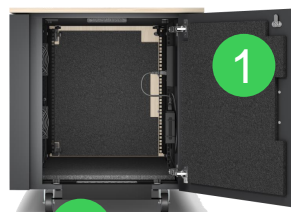

NetShelter CX Enclosures

The NetShelter CX Mini AR4000MV is being discontinued and replaced with **AR4000MVA** which is refreshed for improved product quality and customer experience.

The updated AR4000MVA will feature:

- 1 Updated rear door**
New rear door design vs a removeable panel will provide easier access to the rear of the enclosure.
- 2 New rear cable port for increased cable management**
Rear cable port with swing style bracket allows for more cables to be passed in/out of the enclosure and kept securely in place once the cable port and rear door of the enclosure is closed.
- 3 Non-skid castors**
Updated castors provide a smoother and more reliable method of moving the enclosure across floor surfaces.
- 4 New power cord kit for 120V installations (AR4605)**
Unnecessary cord sets for international installations have been removed to reduce waste and a separate power cord set is now available for purchase for 120V installations.
