Model C6230

If you don't want to use the Nighthawk app, set up your modem router using the instructions in Install using the modem router web interface.

BEFORE RETURNING THIS PRODUCT TO THE STORE FOR ANY REASON, call NETGEAR Technical Support at 1-866-534-9377 or visit https://kb.netgear.com/000061156/How-can-ltroubleshoot-my-cable-modem.

#### **NETGEAR**<sup>®</sup>

# Quick Start

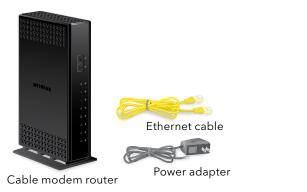

## **NIGHTHAWK** AC1200 WiFi Cable Modem Router

#### Download the Nighthawk app to get started

For more information about the Nighthawk app, visit *Nighthawk-app*. com. Set up your modem router and activate your Internet service with the Nighthawk app.

#### Package contents

A sticker on the side of your cable modem displays the preset WiFi network name, password, and QR code.

## Install using the modem router web interface

Before you begin:

- Collect your cable Internet service provider (ISP) account information, such as your account mobile phone number, user name, password, and account number, and the modem router's MAC address (on the modem router label).
- If you use Xfinity, download the Xfinity app from the App store or from Google Play<sup>™</sup>. If you already have the Xfinity app, make sure you have updated to the latest version.

#### Connect your modem router

1. Turn off and disconnect existing modems and routers.

If you are replacing a modem that is currently connected in your home, unplug the modem and plug the new modem router into the same outlet.

2. Connect a coaxial cable.

Use a coaxial cable to connect the coaxial cable connector on the modem router to the cable wall outlet. Make sure the cable is tightly connected.

We recommend connecting directly to the cable wall outlet. If you must share the connection, use a 3.5dB (1 to 2) splitter.

- 3. Connect the power adapter to the modem router and plug the power adapter into an electrical outlet.
- 4. Wait for the Online LED 4 to light solid green for at least one minute. This process might take up to 10 minutes and the modem router might reset several times.

**Note:** When the Online LED lights, your modem router is still not connected to the Internet. You must activate your modem router with your ISP.

If after 10 minutes the LED is still not solid green, verify that the cable outlet is working, or call your ISP to make sure you have a connection.

#### Set up and activate your modem router

#### 1. If you use **Xfinity**:

- a. If your current modem is leased from Xfinity, call Xfinity support to remove your leased modem from your Xfinity service.
- b. Make sure that your mobile device is using an LTE Internet connection (do not connect to a WiFi network).
- c. Open the Xfinity app and sign in with your Xfinity ID.
- d. Follow the steps to get online.

The activation process takes about 5 minutes.

- e. On your mobile device, launch a web browser and enter **routerlogin.net** or 192.168.0.1 in the address field.
- Go to Step 5.
- 2. If you use another Internet service provider:
  - a. Connect your computer or mobile device to the modem router with WiFi or Ethernet:

WiFi. Use the WiFi network name (SSID) and password on the modem router label to connect.

**Ethernet**. Use an Ethernet cable to connect a computer to an Ethernet port on the modem router. (Your computer must have an Ethernet port.)

- activation.

- Serial number
- MAC address

5. After activation is complete and the Internet Status is ONLINE in the browser, click **NEXT**.

- 6. Follow the prompts to:
  - auestions.

## Regulatory and Legal

For regulatory compliance information including the EU Declaration of Conformity, visit https://www.netgear.com/about/regulatory/.

See the regulatory compliance document before connecting the power supply.

By using this device, you are agreeing to NETGEAR's Terms and Conditions at https://www.netgear.com/about/terms-and-conditions. If you do not agree, return the device to your place of purchase within your return period.

**NETGEAR**, Inc. 350 East Plumeria Drive San Jose, CA 95134, USA

b. Launch a web browser and enter routerlogin.net or 192.168.0.1 in the address field.

3. When the Activate Internet Service page displays, select your ISP.

4. Either follow your ISP's online activation procedure or call your ISP for

The page displays this information about your modem router:

Model number C6230

If you phone your ISP for activation, the person you speak to might need this information.

The NETGEAR account page displays and you are prompted to change your modem router's admin credentials and set up security questions.

• Change your modem router's admin credentials and set up security

Register your modem router.

• Review your WiFi network name and password.
