

Kensington®

Lock Slots Have
Changed. Choose
NanoSaver®.

Devices Have Become Slimmer... And with NanoSaver[®], so too has the Kensington Security Slot

Kensington[®]

STANDARD KENSINGTON SECURITY SLOT (T-BAR™)

Slot size:
7 x 3mm

The original lock slot found on the vast majority of electronic devices

KENSINGTON NANO SECURITY SLOT

Slot size:
6 x 2.5mm

Used on new ultra-thin HP, Lenovo & Asus laptops and select other devices

The **Kensington Standard Security Slot™** has been *the* standard for laptop security for almost 30 years. And just as today's devices have become slimmer and more compact, so too has the Kensington slot. 70% smaller than our standard slot, the **Kensington Nano Security Slot** has been adopted by **HP** in their laptops, with **Lenovo** and **Asus** also embracing the space-saving design.

WITH PRE-SET COMBINATION CODE**

Administrators allocate and manage each lock via Register & Retrieve™.

WHEN TIME IS OF THE ESSENCE...

Kensington®

Think Fast...Track

At Kensington, we appreciate that more and more IT roll outs are required at short notice - if you require a Custom Keyed solution, this can add more pressure to an already tight schedule.

To address this, Kensington have created FastTrack - a concise range of our most popular, high-demand Custom Keyed solutions. Available in packs of 25 locks, each product is held in stock, improving our lead times to you and supporting end user roll-out schedules.

NANOSAVER®

Why Choose Kensington?

CREATOR OF THE LAPTOP LOCK

Kensington originated the T-Bar™ lock in 1981 and created the NanoSaver® lock in 2016. We've sold enough laptop locks to circle the World twice!

VERIFIED AND TESTED

Verified and tested for industry-leading standards in torque/pull, foreign implements, lock lifecycle, corrosion, and other environmental conditions.

Register & Retrieve™

REGISTER & RETRIEVE™ ONLINE PORTAL

Lock registration tool that allows administrators to easily manage locks and offers combination retrieval if a code is ever forgotten or misplaced.

WHY KENSINGTON FOR DEVICE SECURITY?

Extra Layers of Protection

With many organisations moving to hybrid working, today's workplace is no longer a single, easy-to-secure location. IT managers may have 1,000 devices in 1,000 locations... while the average data breach costs £2.89M to resolve. Kensington helps your employees work like pros and protect data, wherever they are.
