MICROCLEAR CLEANING PADS

Why the MicroClear?

When you're on the move, you don't always have the time and space to carry cleaning supplies for your device screens. From cell phones to PDAs to your laptop, a dirty, smudged or fingerprint covered screen can be at the very least annoying, and can leave a bad impression on clients or anyone else around you.

Enter the MicroClear. The MicroClear is a soft, self adhesive pad that you can stick to any of your portable devices and have a cleaning solution with you wherever you go! The MicroClear cleaning surface will never scratch your devices, and the self-adhesive backing won't leave tacky adhesive behind, but is durable enough to be re-used thousands of times. Also, the anti-bacterial properties of the MicroClear material ensure that germs will be kept to a minimum!

For a portable cleaning solution, the answer is MicroClear!

Features

- Antibacterial - Removes dirt and bacteria in one swipe
- Self-adheres anywhere on device when not in use
- Retains adhesive for thousands of uses
- MicroFiber will not scratch surfaces
- The perfect solution for Cell Phones, Digital Camera LCDs, MP3 Player screens, PDA screens, Portable Gaming Devices and Portable DVD Player/Laptop screens
