

Slim NanoSaver™ Combination Laptop Lock

Slim profile, broad benefits.

K60605WW

Product Description

With today's slim laptops with nano security slots, a typical cable lock head might be too thick, unevenly raising the device off its surface. The Slim NanoSaver™ Combination Laptop Lock is the strongest keyless locking solution that allows ultra-thin and 2-in-1 laptops with nano lock slots to lie flat and stable.

Features

- Slim nano lock head won't raise your device off its surface, allowing it to lie flat and stable.
- Tough lock head and cable are independently verified and tested for industry-leading standards in torque/pull, foreign implements, lock lifecycle, corrosion, and other environmental conditions. Carbon steel cable resists cutting attempts, and anchors to desks, tables and other attachment points.
- Unique lock engagement features expanding side "hooks" that grab the internal sides of the nano lock slot, creating a strong connection between the device frame and the lock to resist and deter theft.
- Pivot and rotate cable head featuring one-handed operation allows for easy and flexible connection and movement.
- 4-wheel number code offers 10,000 possible combinations. Free code registration through Register & Retrieve™ allows for quick, easy, and secure lookup if the combination is ever lost or forgotten.
- A two-year warranty means you can rest assured knowing you're covered by Kensington, inventor and worldwide leader in laptop security locks.
