

JABRA PERFORM 75

Hands-free, headset built for retail shiftwork

**PUSH-TO-TALK (PTT) INTEGRATION**

In the retail world, every second counts. Which means teams need to be able to communicate quickly and handsfree. With Perform 75, associates can use Push-to-Talk (PTT) to communicate without having to reach for their handheld device. So questions, queries and problems get solved fast and hands-free.

UNIVERSALLY COMPATIBLE

Besides phone calls, Perform 75 integrates with leading PTT and Voice-Directed Picking (VDP) software, popular UC platforms like Microsoft Teams and Zoom, as well as AI Agents retailers might want to introduce in the future.

BUILT FOR SHIFTWORK

Thanks to its modular, easy-to-use design, starting a shift has never been simpler. Associates can just grab a boom arm, connect a battery, attach to their headband (or neckband) then pair it with their handheld device. And with a hot-swappable battery, up to 20 hours of call time (including up to 50 hours of PTT time), and a 10-bay charger – this headset's all about 100% uptime.

COMFORT & FLEXIBILITY

Perform 75 can be worn on either ear and is comfortable to wear from the first hour to the last. Featuring cushioned earcups, a lightweight design and multiple wearing styles (behind the neck or over the head), associates can find the fit that works for them.

99% NOISE CANCELLATION

The Perform 75 is engineered with industry-leading microphone noise cancellation to block out 99% of background noise. Whether it's the sound of warehouse machinery or the bustle of the shop floor – associates are heard clearly the first time, every time.

DESIGNED FOR DURABILITY

With a robust IP65 rating against dust and water, this high-performance headset is built to withstand the toughest environments. From walk-in freezers to dry storage, the Perform 75 can be used in extreme temperatures – from 60°C all the way down to -30°C. And because we know how demanding busy shifts can be, we've drop-tested it to 2.1m too.

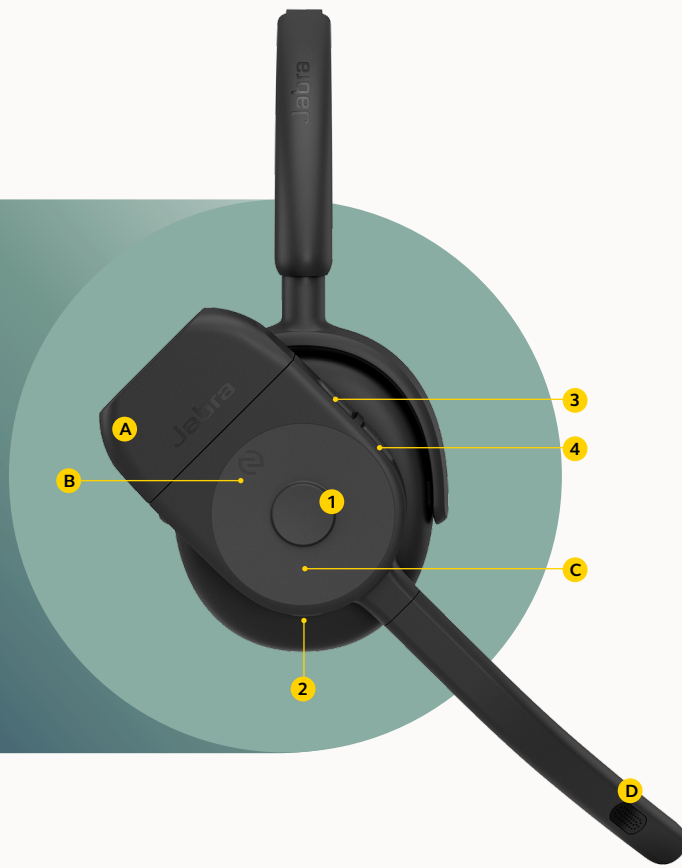

HOW TO CONNECT AND USE

HOW TO PAIR

Double press the multifunction button (2) then go to the Bluetooth® menu of your device or use the NFC zone (B)

- Lift the boom arm to mute
- Pull the boom down to unmute

1	CUSTOMIZABLE BUTTON
	Push-to-Talk (PPT)
	Mute (in a call)
	Voice control (standby)
