

# SP-i201U

## USB Speakers for Digital Audio

Genius adds the SP-i201U, 2-piece USB speakers, to its USB speaker series. Using an advanced high-efficiency digital class-D IC, the sound performance is crystal clear with bass enhancement and minimal distortion, which is better than the current analog solution. A 2" micro driver protected by a metal grill cover with chrome ring decoration in a piano black cabinet gives you a stylish design that looks great with your notebook or your LCD desktop. In addition, the volume adjustment on the front panel for easy operation is different from other USB speakers, which control the volume from a PC or notebook. There's also a headphone jack for private listening and a line in jack with extra stereo audio cable for listening or sharing MP3 or other stereo devices. Installation is easy; just plug and play your favorite songs, watch movies, or make a private multimedia presentation thru the USB cable without the need for an additional power supply.
