Security Printers

When printers are located in open office areas where multiple individuals have access to them, patients, customers, or coworkers can easily walk away with high value paper stock or printed documents. Without proper controls, you may never know that you have been a victim of paper theft.

Storing important documents such as checks, diplomas, and titles in printer paper trays can expose businesses and schools to the mishandling of their valuable documents.

Benefits

Safeguard High-Value Paper Stock

Secure locking trays provide only authorized personnel with access to high-value paper stock.

Prevent Paper Theft

Paper tray shielding helps prevent paper removal from the back of your printer.

Minimize Risk

Corruption, theft, fraud, and forgery are potential and costly risks that can occur if high value paper stock ends up in the wrong hands.

Features

Paper Tray Locks

Locking trays have been designed and custom engineered to fit each security printer, helping to prevent paper pilferage and theft. Secure paper trays can be used to regulate chain of custody, to protect from accidental interference while handling important documents, as well as controlling the amount of potential paper wasted.

Key Lock

Barrel Lock

Combination Lock

Tray Shielding

Tray Shielding uses rugged sheet metal to help prevent paper removal from the back of the printer by blocking the access point. This second layer of protection prevents or minimizes access to the paper tray if an alternative method is attempted.

| GENERAL SPECIFICATIONS | PART NUMBER | DESCRIPTION | INPUT SHEETS PER TRAY | LOCKS | SHIPPING DIMENSIONS | WEIGHT |
