

Eaton 5P Lithium-ion rackmount UPS

Delivering business continuity and advanced management for edge computing environments

Progression in battery technology and remote management come together to make the 5P Lithium-ion rackmount UPS a necessity for edge computing environments. The lithium-ion UPS' "set it and forget it" value proposition, allows IT managers to easily deploy the 5P without the maintenance and refresh challenges of a UPS utilizing lead-acid batteries.

Building on the success of the 5P UPS platform, Eaton has reduced the weight, improved performance and lengthened our warranty. These added benefits, in combination with the extended life of the product, provide IT managers with the opportunity to align their UPS refresh cycles with the rest of IT stack, saving time and money spent on labor and replacement batteries.

Eaton's 5P Lithium-ion battery pack with on-board battery management, monitors battery life, charging cycles and temperature keeping users in the know.

Powering Business Worldwide

Value-added benefits for the 5P Lithium-ion:

Performance:

2-3X longer lifespan allows users to "set it and forget it"—a perfect value-add for remote edge environments.

Resiliency:

6x faster recharge following power disruptions reduces vulnerability and improves runtime.

Safety:

On-board battery management system (BMS) monitoring in combination with proven Lithium Iron Phosphate (LiFePO₄) chemistry provides a reliable and safe offering.

Intelligence:

BMS provides up-to-date insight into battery performance, charge cycles and active temperature monitoring to keep user informed on the lifecycle of their UPS battery.

Installation:

Lightweight design (30% less than a standard lead-acid UPS) in combination with versatile mounting options allow for quick deployment.

Guarantee:

5 years all-inclusive (electronics and battery) warranty, provides peace of mind for customers.
