

## Rolling TV/Monitor Cart for 37" to 70" Flat-Screen Displays, Rotating Portrait/Landscape Mount

MODEL NUMBER: DMCS3770ROT

Heavy-duty mobile TV/monitor stand with rotatable mount allows one-touch transitions between portrait and landscape modes.

### Features

#### Bring the Presentation to Your Audience

This rolling display cart allows you to bring your message to classrooms, lecture halls, offices, auditoriums, conference rooms and other areas requiring flexibility in a screen's location. It features a VESA-compliant display mount that rotates 90° for seamless transitions between portrait and landscape viewing. The DMCS3770ROT is compatible with most flat-panel televisions, monitors, digital whiteboards and interactive displays with screens from 37 to 70 inches. Made of steel and aluminum, the cart supports displays up to 154 lb.

#### Match the Screen to Your Content with One-Touch Rotation

Rotate your screen 90° by hand for a smooth transition between portrait and landscape orientations. The rotation does not require tools or removal of the display. Choose the view that works best with your content, such as portrait mode for making a list on an interactive display. If preferred, the screen can be fixed in either position.

#### Effectively Share Audio/Video Resources

An alternative to purchasing multiple displays, the DMCS3770ROT allows a large screen and peripherals to be shared within a facility and stored in a secure area. The heavy-duty swivel casters roll smoothly through doorways and over thresholds. All four casters lock to keep the cart in position.

#### Adjust the Tilt for Comfortable Viewing and Writing

To minimize glare and provide an ergonomic writing position, the mount has +5° tilt adjustment.

#### VESA-Compliant Mounting Ensures Display Compatibility

VESA (Video Electronics Standards Association) promotes uniformity in the video electronics industry by developing standards for TVs and monitors. For hassle-free display compatibility, this rotatable mount supports the following VESA mounting hole patterns: 200 x 200, 300 x 300, 350 x 350, 400 x 200, 400 x 400, 600 x 200 and 600 x 400. Display mounting hardware is included.

#### Conveniently Place Peripherals and Manage Cables

The shelf holds a laptop or an audio/video component, such as a Blu-ray player. It supports up to 11 lb. and extends toward the rear of the cart to avoid interference with screen rotation. Cable management openings in the columns allow you to conceal power and connection cords, reducing clutter for a clean, professional look.

### Highlights

- Supports most flat-panel monitors and interactive displays from 37 to 70 in.
- Mount rotates 90° with a single touch for portrait or landscape viewing; no tools needed
- Heavy-duty casters enable smooth rolling and lock to secure the cart at rest
- +5° tilt offers an ergonomic angle for writing on a whiteboard or interactive display
- Supports screens up to 154 lb. Laptop shelf supports up to 11 lb.

### Applications

- Easily switch between portrait and landscape modes to better accommodate your content or match the orientation of a source device
- Adjust the angle of a digital whiteboard or interactive display for a more comfortable writing angle during a brainstorming session
- Move a flat-panel display into a lobby, hallway or trade show booth to create temporary digital signage

### System Requirements

- Flat-screen television, monitor, digital whiteboard or interactive display from 37 to 70 in.

### Package Includes
