Introduction

Use the TBT3TBTADAP adapter to connect a Thunderbolt 3 desktop or laptop computer to legacy Thunderbolt devices, including external hard drives, displays, and Mac computers that are Thunderbolt capable. The TBT3TBTADAP is compatible with first-generation Thunderbolt and Thunderbolt 2 devices, making it a cost-effective method to connect newer devices to older peripherals.

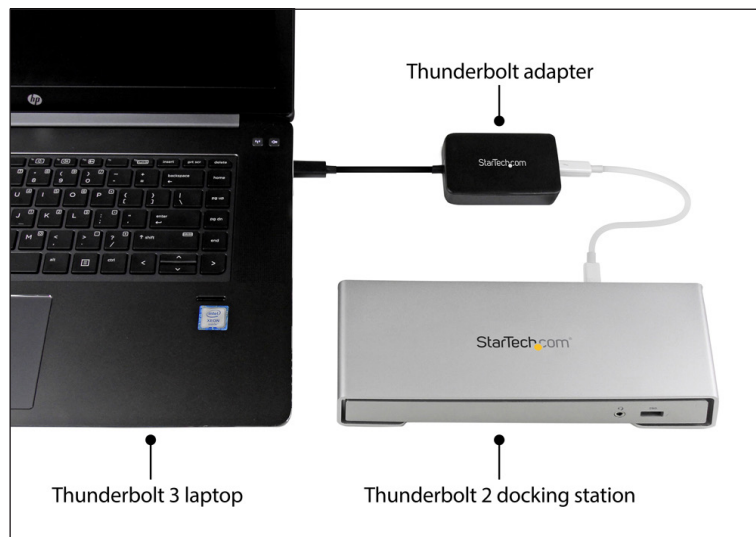

You can use the TBT3TBTADAP to connect to first-generation Thunderbolt devices at 10Gbps and Thunderbolt 2 devices at 20Gbps.

Connect the Thunderbolt adapter

Note: Your desktop or laptop computer may need updates in order for the Thunderbolt 3 ports to function properly. For more information, visit <http://thunderbolttechnology.net/updates>.

Make sure that the Thunderbolt device that you're using with the TBT3TBTADAP is compatible with the OS that you're running on your computer.

1. Connect the **Thunderbolt 3 USB-C** connector to the **Thunderbolt 3 USB-C** port on your desktop or laptop.
2. Use a Thunderbolt cable to connect the Thunderbolt device to the **Thunderbolt 2** port on the Thunderbolt adapter.
3. If you're using a Windows® operating system, a pop-up message may appear requesting permission to allow the adapter to connect to your computer. If this message appears, click **OK > Yes**. In the drop-down list, select **Connect always** and click **OK**.

FCC Compliance Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by StarTech.com could void the user's authority to operate the equipment.
