

HIGH-GAIN ANTENNAS

WRT002ANT WRT004ANT

These dual-band, omni-directional high-gain antennas are the latest addition to the Linksys line of premium networking products. They provide a vast improvement in the range of your wireless device, with enhanced coverage in a horizontal plane. Each antenna delivers up to 4 dBi in the 2.4 GHz band and up to 7 dBi in the 5 GHz band—for up to 2x antenna gain over stock antennas.*

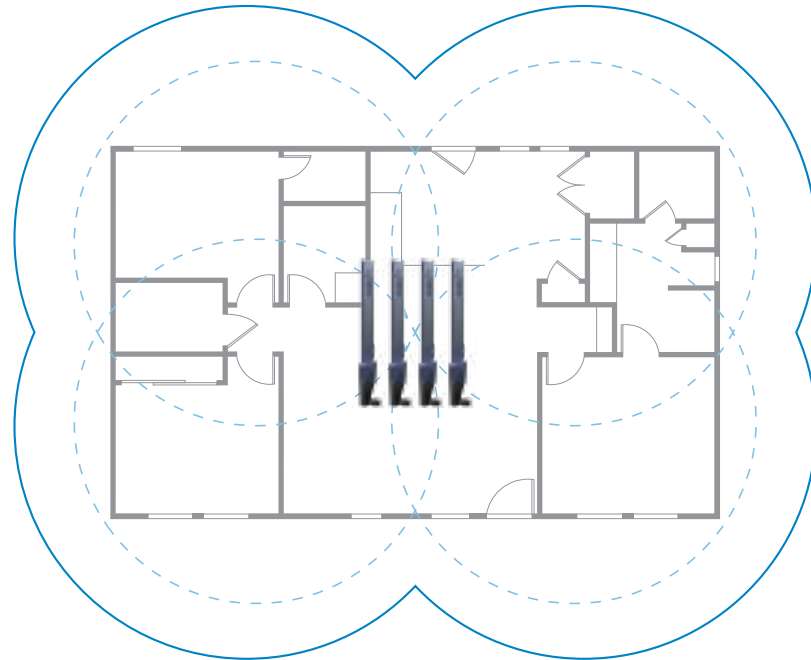

Linksys High-Gain Antennas are compatible with any Wi-Fi device that uses an RP-SMA connector, making for extremely easy installation. To swap out a device's existing antennas, simply unscrew the factory antennas and screw on these high-gain antennas for an immediate boost in your Wi-Fi performance.

Available in two and four packs.

Key Features

- **2x Gain***: Offers up to double the antenna gain of standard antennas.
- **Omnidirectional**: Increased Wi-Fi signal range for enhanced coverage on a horizontal plane.
- **Easy Setup**: Simply unscrew existing antennas and screw on the high-gain antennas.
- **Dual-Band**: Delivers up to 4 dBi in the 2.4 GHz band and up to 7 dBi in the 5 GHz band.

Warranty

1-Year Limited Warranty

Specifications are subject to change without notice.

* Actual performance may vary, including lower wireless network capacity, data rate, range, and coverage. Performance depends upon many factors and variables, including products used, interference, and other adverse conditions. 7 dBi (for 5 GHz) is up to 2x average antenna gain more than 3.5 dBi (for 5 GHz) for stock antennas. The antenna also provides 4 dBi (for 2.4 GHz), which is up to 1.5x average antenna gain compared to 2.5 dBi (for 2.4 GHz).

An active, customer-purchased Internet Service Provider broadband account is required for connection of this router and other connected computers and devices to the Internet.
