Features

Compact Power Strip Delivers Electricity to 2 Devices at the Same Time
Compatible with standard electrical equipment, this Protect It!® power strip plugs directly into a wall outlet (no cord required). It features two BS1363A outlets and a durable white plastic housing. It is ideal for powering almost anything with a compatible plug, including computers and mobile devices to appliances and power tools.

Compact High-Impact Housing Makes Connecting in Tight Spaces Easier
This direct-plug power strip is easy to install in confined spaces, such as behind furniture. One outlet is located on top of the unit, so a connected power cord runs parallel to the wall, allowing you to push furniture against the wall to maximize space.

Premium Safety Features Designed for Protecting Your Valuable Equipment
An integrated 13A circuit breaker protects all outlets and automatically cuts power if the protection circuit is incapacitated, preventing equipment damage and indicating replacement is required.
