Electricity and Safety

Warning

- Do not use a damaged power cord or plug, or a loose power socket.
- Do not use multiple products with a single power socket.
- Do not handle the power cord with a wet body part.
- Insert the power plug all the way in so it is not loose.
- Connect the power plug to a grounded power socket (type 1 insulated devices only).
- Do not bend or pull the power cord with force. Be careful not to leave the power cord under a heavy object.
- Do not place the power cord or product near heat sources.
- Clean any dust around the pins of the power plug or the power socket with a dry cloth.

Caution

- Do not disconnect the power cord while the product is being used.
- Only use the power cord provided with your product by Samsung. Do not use the power cord with other products.
- Keep the power socket where the power cord is connected unobstructed.
 - The power cord must be disconnected to cut off power to the product when an issue occurs.
- Hold the plug when disconnecting the power cord from the power socket.

Installation

Warning

- DO NOT PLACE CANDLES, INSECT REPELLANTS OR CIGARETTES ON TOP OF THE PRODUCT. DO NOT INSTALL THE PRODUCT NEAR HEAT SOURCES.
- Do not install the product in poorly ventilated spaces such as a bookcase or closet.
- Install the product at least 10cm away from the wall to allow ventilation.
- Discard the plastic packaging that the product is packaged in, immediately after unpacking.
 - Plastic packaging material can cause suffocation if it is handled improperly.
- Do not install the product on an unstable or vibrating surface (insecure shelf, sloped surface, etc.)
 - The product may fall and become damaged and/or cause an injury.
 - Using the product in an area with excess vibration may damage the product or cause a fire.
- Do not install the product in a vehicle or a place exposed to dust, moisture (water drips, etc.), oil, or smoke.
- Do not expose the product to direct sunlight, heat, or a hot object such as a stove.
 - The product lifespan may be reduced or a fire may result.
- Edible oil, such as soybean oil, can damage or deform the product. Do not install the product in a kitchen or near a kitchen counter.

Caution

- Do not drop the product while moving.
- Do not set down the product on its front.
- When installing the product on a cabinet or shelf, make sure that the bottom edge of the front of the product is not protruding.
 - The product may fall and become damaged and/or cause an injury.
 - Install the product only on cabinets or shelves of the right size.
- Set down the product gently.
 - Product failure or personal injury may result.
- Installing the product in an unusual place (a place exposed to a lot of fine dust, chemical substances, extreme temperatures or a significant presence of moisture, or a place where the product will operate continuously for an extended period of time) may seriously affect its performance.
 - Be sure to consult Samsung Customer Service Center if you want to install the product at such a place.
- Before assembling the product, place the product down on a flat and stable surface so that the screen is facing downwards.
 - The product is curved. Placing pressure on the product when on a flat surface may damage the product. When the product is on the ground facing up or down, do not put pressure on it.
- In the same series, the color can vary depending on the size.

Operation

Warning

- There is a high voltage inside the product. Never disassemble, repair or modify the product yourself.
 - Contact Samsung Customer Service Center for repairs.
 - To move the product, first disconnect all the cables from it, including the power cord.
 - If the product generates abnormal sounds, a burning smell or smoke, disconnect the power cord immediately and contact Samsung Customer Service Center.
 - Do not hang on to or climb on the product.
 - The product may tip over or fall, causing injury or death.
 - If the product is dropped or the outer case is damaged, turn off the power and disconnect the power cord. Then contact Samsung Customer Service Center.
 - Continued use can result in a fire or electric shock.
 - Do not put heavy objects, toys or snacks on top of the product.
 - Hanging on to the product to get a toy or snack may cause heavy objects to fall or the product to tip over, resulting in injury or death.
 - During a lightning or thunderstorm, power off the product and remove the power cord.
 - Do not drop objects on the product or apply impact.
 - Do not move the product by pulling the power cord or any cable.
 - If a gas leakage is found, do not touch the product or power plug. Also, ventilate the area immediately.
- Do not lift or move the product by pulling the power cord or any cable.
 - Do not use or keep combustible spray or an inflammable substance near the product.
 - Ensure the vents are not blocked by tablecloths or curtains.
 - An increased internal temperature may cause a fire.
 - Do not insert metallic objects (chopsticks, coins, hairpins, etc) or objects that burn easily (paper, matches, etc) into the product (via the vent or input/output ports, etc).
 - Be sure to power off the product and disconnect the power cord when water or other foreign substances have entered the product. Then contact Samsung Customer Service Center.
 - Do not place objects containing liquid (vases, pots, bottles, etc) or metallic objects on top of the product.
 - Be sure to power off the product and disconnect the power cord when water or other foreign substances have entered the product. Then contact Samsung Customer Service Center.
 - Do not use liquid fumigators containing chemicals, such as mosquito repellent or air freshener, around the product.
 - If steam comes in contact with the product surface or enters the product, it may cause stains or malfunction.

Caution

- Leaving the screen fixed on a stationary image for an extended period of time may cause afterimage burn-in or defective pixels.
 - Set the screen to power-saving mode or moving-picture screen saver when not using the product for an extended period of time.
- Disconnect the power cord from the power socket if you do not plan on using the product for an extended period of time (vacation, etc).
 - Dust accumulation combined with heat can cause a fire, electric shock or electric leakage.
- Use the product at the recommended resolution and frequency.
 - Your eyesight may deteriorate.
- Do not put AC/DC adapters together.
- Remove the plastic bag from the AC/DC adapter before you use it.
- Do not let water enter the AC/DC adapter device or get the device wet.
 - An electric shock or fire may result.
 - Avoid using the product outdoors where it can be exposed to rain or snow.
 - Be careful not to get the AC/DC adapter wet when you wash the floor.
- Do not put the AC/DC adapter near to any heating apparatus.
 - Otherwise, a fire may result.
- Keep the AC/DC adapter in a well-ventilated area.
- If you place the AC/DC power adapter hanging with the cord input facing upwards, water or other foreign substances could enter the Adapter and cause the Adapter to malfunction.
Make sure to rest the AC/DC power adapter flat on a table or the floor.

-
- Do not hold the product upside-down or move it by holding the stand.
 - The product may fall and become damaged or cause an injury.
 - Looking at the screen too close for an extended period of time can deteriorate your eyesight.

 - Parts of the human body may become caught and could be injured.
 - Tilting the product at an excessive angle may cause the product to fall and an injury may result.
 - Do not place heavy objects on the product.
 - Product failure or personal injury may result.
 - When using headphones or earphones, do not turn the volume too high.
 - Having the sound too loud may damage your hearing.

Cleaning

High-glossy models can develop white stains on the surface if an ultrasonic wave humidifier is used nearby.

— Contact your nearest Samsung Customer Service Center if you want to clean the inside of the product (Service fee will be charged.)

Do not press the monitor screen. There is a risk of damaging it.

— Exercise care when cleaning as the panel and exterior of advanced LCDs are easily scratched.

— The product screen is vulnerable to fingerprints, as there is no protective film on it. (S27FG90*X models only)

Take the following steps when cleaning.

- 1 Power off the product and PC.
- 2 Disconnect the power cord from the product.
 - When removing the power cord, hold the plug. Never hold the plug with a wet body part. Otherwise, an electric shock may result.
- 3 Wipe the product with a clean, soft and dry cloth.

Wet a soft cloth in water, wring it out well, and then use the cloth to wipe the exterior of the product clean.

 - Do not apply a cleaning agent that contains alcohol, solvent, or surfactant to the product.
 - Do not spray water or detergent directly on the product.
- 4 Connect the power cord to the product when cleaning is finished.
- 5 Power on the product and PC.

Correct posture to use the product

Use the product in the correct posture as follows:

- Straighten your back.
- Allow a distance of 45 to 50cm in 2D mode between your eye and the screen, and look slightly downward at the screen.
- Keep your eyes directly in front of the screen.
- Adjust the angle so light does not reflect on the screen.
- Keep your forearms perpendicular to your upper arms and level with the back of your hands.
- Keep your elbows at about a right angle.
- Adjust the height of the product so you can keep your knees bent at 90 degrees or more, your heels attached to the floor, and your arms lower than your heart.
- Do the Eye exercises or blink frequently, then eye fatigue will be relieved.

Check the direction of the arrow on the stand base. Align the direction of the arrow on the stand base with the front direction of the stand neck, and then insert the stand neck from top to bottom.

Turn the stand neck clockwise to fasten it to the base. Lift the stand slightly and check that the PUSH button on the bottom of the base protrudes.

2

Push the assembled stand into the main body in the direction of the arrow as shown in the figure.

Confirm that the stand is tightly fastened. If ❶ has not been fully lowered, lower it while holding it with your hand.

3

Attach the COVER-REAR TOP to the rear of the monitor, as shown in the figure. (S27FG60*E / S27FG70* / S37FG75* / S40FG75* models only.)

4

Stand up the monitor as shown in the figure.

5

Stand assembly is complete.

Separating the stand neck from the stand base

Lift the assembled stand slightly and press the PUSH button on the bottom of the base. While holding down the PUSH button, turn the stand neck anticlockwise to remove it.

S27FG90*X

1

Put the stand base onto the stand neck as the direction shown in the figure. Check that the stand neck is firmly connected.

2

Tightly fasten the connecting screw at the bottom of the stand base.

3

Push the assembled stand into the main body in the direction of the arrow as shown in the figure. Confirm that the stand is tightly fastened. If **a** has not been fully lowered, lower it while holding it with your hand.

4

Stand assembly is complete.

Precautions for moving the product

— The color and shape of parts may differ from what is shown. Specifications are subject to change without notice to improve quality.

- Hold the lower corners or edges of the product when moving it.

- Do not directly apply pressure on the screen.
- Do not hold the screen when moving the product.

- Do not hold the product upside down only by the stand.

- Do not press down on the product. There is a risk of damaging the product.

- Be careful not to get any body parts caught.

- Do not arbitrarily remove the panel film. If not observed, the warranty service may be restricted.

Checking the space around the product

Make sure to have enough space for ventilation when placing the product. An internal temperature rise may cause fire and damage the product. Maintain enough space around the product as shown in the diagram when installing the product.

— The exterior may differ depending on the product.

S27FG90*X

- The product tilt and height can be adjusted.
- Hold the top center of the product and adjust the height carefully.
- When adjusting the stand height, you may hear a noise. This noise is generated because the ball inside the stand slides when the stand height is adjusted. It is a normal noise and not a product malfunction.
- When adjusting the left/right angles of the product, there may be a slight gap in the connection area of the stand base. This is normal and does not indicate a malfunction of the product.

Caution

The color and shape of parts may differ from what is shown. Specifications are subject to change without notice to improve quality.

S27FG50*S

- Do not hold the moving area of the stand when adjusting the tilt or height of the product. It may cause injury.
- When installing the product on a cabinet or shelf, make sure that the bottom edge of the front of the product is not protruding.

- Be sure to fully extend the stand before rotating the product.
- If you rotate the product without fully extending the stand, the corner of the product may hit the floor and get damaged.
- When rotating the product, be careful not to damage the product by hitting the object or stand.

Wall Mount Kit Specifications (VESA)

Install your wall mount on a solid wall perpendicular to the floor. Before attaching the wall mount to surfaces other than plaster board, please contact your nearest dealer for additional information. If you install the product on a slanted wall, it may fall and result in severe personal injury. Samsung wall mount kits contain a detailed installation manual and all parts necessary for assembly are provided.

- Do not use screws that are longer than the standard length or do not comply with the VESA standard screw specifications. Screws that are too long may cause damage to the inside of the product.
- When installing the wall mount other than the specified product, its installation may be difficult.
- For wall mounts that do not comply with the VESA standard screw specifications, the length of the screws may differ depending on the wall mount specifications.
- Do not fasten the screws too firmly. This may damage the product or cause the product to fall, leading to personal injury. Samsung is not liable for these kinds of accidents.
- Samsung is not liable for product damage or personal injury when a non-VESA or non-specified wall mount is used or the consumer fails to follow the product installation instructions.
- Do not mount the product at more than a 15 degree tilt.
- Use the power cable provided with the monitor. (The power input connector on the monitor is 'L' shaped.)
- To install the monitor on a stand, use the supplied stand.
To use on a personally purchased mounting device (e.g. a monitor arm, stand, or wall mount), install the cables with sufficient slack to allow the monitor to tilt or rotate.
If a cable is pulled or squeezed, the input connector may be damaged, and any damage resulting from this is not covered under warranty.
- Standard dimensions for wall mount kits are shown in the table follow.

Connecting to headphones or earphones

- Use headphones or earphones when activating sound with an HDMI-HDMI or DP cable.
- The headphones or earphones jack supports only the 3 conductor tip-ring-sleeve (TRS) type.
- S27FG90*X models are not supported.

Connecting the Product to a PC as a USB HUB

Using the product as a hub, connect and use various source devices with the product at a time.

- S27FG50*E / S32FG50*E / S27FG50*S / S27FG60*E models are not supported.
- Port names and the number of ports may differ, depending on the model.

- To detect and start a USB device faster, connect the USB device to the ^{SS} (SERVICE) ^{SS} port on the product. The read/write rate will be affected by the USB device and your PC.
- For USB-related problems caused by OS, drive programs or software, please contact relevant suppliers.
- With the launch of various USB devices on the market, we cannot guarantee that our products are matched with all USB devices.
- For an external mass-storage HDD requiring external power supply, be sure to connect it to a power source.
- The company is not liable for problems or damages to an external device caused by using an unauthorized cable for the connection.
- Some products do not follow the USB standard, and it may cause a malfunction of the device.
- It is recommended that users use USB devices of 5V/1A or lower.

- 1 Connect the power cord to the AC/DC adapter. Then, connect the AC/DC adapter to the DC **V port on the back of the product.
 - Rated power consumption for adapters differs depending on the model. Use an adapter that meets the power consumption specification of the model.
- 2 Next, connect the power cord to the power outlet.
- 3 Press the  button of the product to turn it on.

— The input voltage is switched automatically.

Tidying Up the Cables

S27FG50*E / S32FG50*E

Connect the corresponding cables.

Put both cables in the cable holder on the stand (HOLDER-STAND CABLE) to organize the cables, as shown in the figure.
Assembly is complete.

S27FG50*S

Connect the corresponding cables.

Put both cables in the cable holder on the stand (HOLDER-STAND CABLE) to organize the cables, as shown in the figure.
Assembly is complete.

S27DG60*S / S27DG61*S / S27FG60*S / S27FG60*E / S27FG70* / S37FG75* / S40FG75* / S27FG81*S / S32FG81*S

Connect the corresponding cables.

Pull the right side of the HOLDER-STAND CABLE to remove from the stand. The left side of the HOLDER-STAND CABLE can be damaged when pulled forcibly.

Put both cables in the cable holder on the stand (HOLDER-STAND CABLE) to organize the cables, as shown in the figure.
Assembly is complete.

S27FG90*X

Pass cables through the hole on the stand.

Connect the cables to the corresponding ports.

Organize cables by passing them through the hole on the stand, as shown in the figures.

Setting Optimum Resolution

An information message about setting optimum resolution will appear if you power on the product for the first time after purchase.

Select a language on information message and change the resolution on your PC to the optimum setting.

- If the optimum resolution is not selected, the message will appear up to three times for a specified time even when the product is turned off and on again.
- To set the Optimum resolution, go to **Menu** → **System** → **Input Port Ver.** and set HDMI/DP to the maximum version.

Using the 3D Monitor

- This feature is supported in the S27FG90*X models only.
- Experience outstanding 3D effects through eye-tracking and view-mapping technologies, without having to wear 3D glasses.
- Play 3D games and videos through Odyssey 3D Hub.
- Convert 2D videos into 3D videos.
 - For details on your 3D monitor, please visit the Samsung website at <http://www.samsung.com>, and refer to the User guide.

To view 3D content:

- Make sure the camera is not exposed to direct light.
- Do not cover your face, so that your entire face can be recognized.
- Center your face in the camera, and make sure the camera is pointed at your face.
- Make sure the device's screen resolution is set to 3840 x 2160.
- 3D experience is limited to one person at a time.
- Avoid making sudden, large movements of your head.
- Please watch 3D content within the recommended viewing distance (55–95 cm).
- The optimal viewing angle for watching 3D videos is 25 degrees to the left and right of the front of the screen.

CAUTION

Before using the 3D function, read the following precautions:

- Some viewers may experience discomfort while watching 3D content, such as dizziness, nausea or headaches. If you experience these symptoms, stop watching 3D content and rest.
- Watching 3D content for long periods of time can cause eye fatigue. If this happens, please stop watching 3D and rest.

Read before using the 3D monitor

- Users can only view games that are compatible with Samsung Odyssey 3D Hub.
- Odyssey 3D Hub is dedicated software for Odyssey 3D, and allows users to play 3D games and to convert 3D videos.
- The product's 3D conversion is only supported through the Odyssey 3D Hub software installed on a computer.
- AMD graphics cards may not convert some 2D videos to 3D.
- Some video players may not support 3D conversion.
- 3D conversion is supported on NVIDIA graphics cards only.
- In pivot mode, the **Edge Lighting** feature and 3D effects are not supported.

- To connect and use multiple monitors, set the 3D monitor as the primary monitor.
- 3D functionality may be limited when using multiple Odyssey 3D monitors.
- 3D conversion is not supported when DRM content is enabled.
- Odyssey 3D Hub may not work properly when HDR mode is enabled.
- 3D conversion supports video conversion only and may not work with games.
- To enable 3D conversion, make sure Odyssey 3D Hub is running and the video is in full screen mode.
- Available 3D effects may differ, depending on the game content and the computer specifications.
- There may be some latency during conversion from 2D videos to 3D videos.
- If you watch 3D content in a space directly exposed to sunlight or lighting, the clarity may appear poor.
- Displayed content may not be seen as intended, depending on the ambient light intensity.
- Users with a large difference in visual acuity between the left and right eyes may not be able to perceive three-dimensionality. The degree to which users perceive three-dimensionality may differ.
- Momentary screen flickering may be experienced during the process of face recognition using the eye tracking function.
- For content that is not guaranteed to be convertible to 3D using Odyssey 3D Hub, the 3D conversion performance may degrade or conversion may not work at all.
 - This feature supports video content conversion only and may not work with games.

Installing the 3D monitor

- Before installing the monitor, check the [Recommended computer specifications](#) for Odyssey 3D Hub.
- Set the 3D input port, using the input selection menu on the product (e.g., HDMI, DP).

1 Connect the product to your computer, using a USB cable.

- Use the USB cable that came with the product.

2 Install the Odyssey 3D Hub software.

- Odyssey 3D monitors can achieve normal 3D effects through Odyssey 3D Hub software only.
- Odyssey 3D Hub software can be downloaded from the Samsung website. Alternatively, install it by searching for “Samsung Odyssey 3D Hub” in the Microsoft Store.
 - * Downloading Odyssey 3D Hub software
 - 1) Visit the Samsung website at <http://www.samsung.com/support>.
 - 2) Search for the model name you purchased, using the model search box. (e.g., LS27FG90*)
 - 3) Download and install the Odyssey 3D Hub software.
 - 4) Follow the on-screen instructions to complete the installation.

3 Reboot the computer.

- Be sure to reboot the computer after installing Odyssey 3D Hub software. If you do not reboot the computer, the software may not work properly.
- To view content at the highest refresh rate, change the related settings in the OSD menu. Change the **DisplayPort Ver.** value to **1.4** and **Input Port Ver.** value to **2.0↑**.
- From the OSD menu on the monitor, set the input source for the 3D computer’s main monitor (e.g., HDMI, DP).
(Menu path: **Game** → **3D PC Selection** → Select Input Source)

Launching Odyssey 3D Hub

- 1 Click the Odyssey 3D Hub icon on the desktop.
- 2 At the top of the screen, a red light illuminates when the camera turns on.
 - Open **Device Manager** in Windows, and check that the stereo camera is enabled.
 - If security software is installed, it may block the camera. Turn off the security settings on the computer (e.g., USB and COM port security settings).
 - If security software is blocking the camera, the camera may not open when you run the camera app in Windows.
- 3 If 3D effects are achieved on the Odyssey 3D Hub home screen, the software has been installed successfully.
 - Set **HDR** to **Off** in Windows.

Playing a game

- 1 In Odyssey 3D Hub, click a game to open its Steam page.
- 2 Log in to the Steam site and install the desired game.
- 3 When the game installation is complete, select the installed path of the game from Odyssey 3D Hub.
- 4 Start playing the game.
 - Already-installed games automatically start when they are selected.

Converting 2D to 3D

— This is supported on NVIDIA graphics cards only.

- 1 When Odyssey 3D Hub is running, run an app that supports full screen mode from the computer's desktop (e.g., YouTube).
- 2 Run the app in full screen mode.
- 3 From the bottom right of the screen of the running app, select the desired screen mode (available mode options: 2D mode and side-by-side mode).
- 4 3D conversion is performed according to the selected mode.

Troubleshooting

Requirements Before Contacting Samsung Customer Service Center

— Before calling Samsung Customer Service Center, test your product as follows. If the problem persists, contact Samsung Customer Service Center.

Product diagnosis (Screen issue)

If a problem occurs with the monitor screen, run [Self Diagnosis](#) to check that the monitor is working properly.

Checking the Resolution and Frequency

If a resolution that is not supported (see the [Standard Signal Mode Table](#)) is selected, the **Not Optimum Mode** message may appear for a short time or the screen may not be displayed properly.

— The displayed resolution may vary, depending on the PC system settings and cables.

Check the following.

Installation issue (PC mode)

Blank spaces are found on all four sides of the screen when an HDMI cable is connected to the product and PC.

The blank spaces found on the screen have nothing to do with the product.

Blank spaces on the screen are caused by the PC or graphics card. To resolve the problem, adjust the screen size in the HDMI settings for the graphics card.

If the graphics card settings menu does not have an option to adjust the screen size, update the graphics card driver to the latest version.

(Please contact the graphics card or PC manufacturer for further details about how to adjust the screen settings.)

Screen issue

The power LED is off. The screen will not turn on.

Check that the power cord is connected properly.

If a problem occurs with the monitor screen, run [Self Diagnosis](#) to check that the monitor is working properly.

The message [Check the cable connection and the settings of the source device](#) appears.

Check that the cable is properly connected to the product.

If the monitor is in **HDMI** or **DisplayPort** mode, press the  button to display the Function Key Guide screen and select the  → **System** → **PC/AV Mode** → **HDMI, DisplayPort** → **PC** or **AV**.

Not Optimum Mode is displayed.

This message appears when the signal from the graphics card exceeds the maximum resolution or frequency for the product.

Change the maximum resolution and frequency to suit the product performance, referring to [Standard Signal Mode Table](#).

The images on the screen look distorted.

Check the cable connection to the product.

The screen is not clear. The screen is blurry.

Remove any accessories (video extension cable, etc.) and try again.

Set the resolution and frequency to the recommended level.

The screen appears unstable and shaky. There are shadows or ghost images left on the screen.

Check that the resolution and frequency for the PC are within the range of resolution and frequency compatible with the product. Next, if required, change the settings, referring to [Standard Signal Mode Table](#) in this manual and the **Information** menu on the product.

— Available functions may differ depending on the model.

The screen is too bright. The screen is too dark.

Adjust **Brightness** and **Contrast**.

Screen colour is inconsistent.

Change the **Color** settings.

The colours on the screen have a shadow and are distorted.

Change the **Color** settings.

White does not really look white.

Change the **Color** settings.

There is no image on the screen and the power LED blinks every 0.5 to 1 second.

Check the cable connection between the product and PC, and ensure the connectors are locked.

Press any key on the keyboard or move the mouse to return to normal operating mode.

The product is operating in power-saving mode.

Text is blurry.

If using a Windows OS (e.g. Windows 7, Windows 8, Windows 8.1 or Windows 10): Go to **Control Panel** → **Fonts** → **Adjust ClearType text** and change **Turn on ClearType**.

Video playback is choppy.

Playback of high-definition large video files can be choppy. This may be because the video player is not optimized for the PC resource.

Try playing the file on another video player.

Sound issue

There is no sound.

Re-check the condition of the connected headphone or earphone or adjust the volume.

Check the volume.

Check whether the volume of the product or the source device is set to mute.

The volume is too low.

Adjust the volume.

If the volume is still low after turning it up to the maximum level, adjust the volume on your PC sound card or software.

Video is available but there is no sound.

Sound cannot be heard if an HDMI-DVI cable is used to connect the input device.

Connect the device using an HDMI cable or a DP cable.

Source device issue

A beeping sound is heard when my PC is booting.

If a beeping sound is heard when your PC is booting, have your PC serviced.

Issues related to the stereo camera

The LED indicator camera at the top of the monitor does not work when using 3D.

Reset the camera if it does not work.

Resetting the camera

- The camera can be reset by removing the USB cable from the product and computer.
 - Use the Device Manager in Windows on the computer.
 - On the computer, navigate to **Device Manager** → **Cameras** → right-click with the mouse on **3D Stereo WebCam** → click **Disable device** menu to change it to **Enable device**.
 - Turn the monitor off and then on again to reset the camera.
-

Other issue

When the product makes popping (cracking) sound.

The sound may be caused by contraction or expansion from temperature change of external components or internal circuit of the product.

This is NOT a product failure and does not affect the life of the product.

The product is getting hot.

It is normal for the product to generate some heat when used. The product has been tested and proven to be safe. You can use it with confidence. The heat generated by the product when used does not affect its performance or lifespan.

— Horizontal Frequency

The time required to scan a single line from the left to the right side of the screen is called a horizontal cycle. The reciprocal number of a horizontal cycle is called horizontal frequency. Horizontal frequency is measured in kHz.

— Vertical Frequency

Repeating the same picture dozens of times per second allows you to view natural pictures. The repeat frequency is called "vertical frequency" or "refresh rate" and is indicated in Hz.

— This product can be set to only one resolution for each screen size to obtain the optimum picture quality due to the nature of the panel. Using a resolution other than the specified resolution may degrade the picture quality. To avoid this, it is recommended that you select the optimum resolution specified for your product.

— Depending on the source device, 4K output from an AV device is supported only when the **Adaptive-Sync** is **Off**.

List of graphic cards supporting HDR10

HDR10 is accessible only on Windows 10 systems equipped with graphic cards that support Play Ready 3.0 Digital Rights Management (for protected HDR content). Use graphic cards listed below for HDR10.

- NVIDIA GeForce 1000 series or higher
- AMD Radeon™ RX 400 series or higher
- Intel UHD Graphics 600 series or higher

— Graphic cards that support hardware-accelerated 10-bit video decoding for HDR video codecs are recommended.

Appendix

Responsibility for the Pay Service (Cost to Customers)

— When the service is requested, in spite of in warranty, we may charge you for a visit from a service technician in the following cases.

Not a product defect

Cleaning of the product, Adjustment, Explanation, Re-installation and etc.

- If a service technician is requested to give instructions on how to use product or simply adjusts options without disassembling product.
- If a defect is caused by external environmental factors (Internet, Antenna, Wired Signal, etc.)
- If a product is reinstalled or devices are connected additionally after installing the purchased product for the first time.
- If a product is reinstalled to move to a different spot or to move to a different house.
- If the customer requests instructions on how to use another company's product.
- If customer requests instructions on how to use the network or another company's program.
- If customer requests software installation and setup for the product.
- If a service technician removes/cleans dusts or foreign materials inside of the product.
- If customer requests an installation additionally after purchasing a product through home-shopping or online.

A Product damage caused by customer's fault

Product damage caused by customer's mishandling or wrong repair

If a product damage is caused by;

- External impact or drop.
- Use of supplies or separately sold product unspecified by Samsung.
- Repair from a person besides an engineer of outsourcing service company or partner of Samsung Electronics Co., Ltd.
- Remodeling or repairing the product by customer.
- Using it with incorrect voltage or non-authorized electrical connections.
- Not following the "cautions" in User guide.

Others

- If product fails by natural disaster. (lightning, fire, earthquake, flood damage, etc)
- If consumable components are all used up. (Battery, Toner, Fluorescent lights, Head, Vibrator, Lamp, Filter, Ribbon, etc.)

— If customer requests a service in case the product has no defect, service fee may be charged. So please read User guide first.

FreeSync (for AMD graphics card)

— This function may not be supported depending on the model.

FreeSync technology is solution that eliminates screen tearing without all the usual lag and latency.

This feature will eliminate screen tearing and lag during game play. Improve your gaming experience.

The displayed FreeSync menu items on the monitor may vary, depending on the monitor model and compatibility with the AMD graphics card.

- **Off:** Disable FreeSync.
- **On:** Turn on the AMD graphics cards' FreeSync function. You may experience intermittent flickers when playing some games.

Apply the optimum resolution when using FreeSync.

The refresh rate setting method please refer to Q & A → How can I change the frequency?

— This menu is not available when **PC/AV Mode** is set to **AV**.

— This menu is not available when **PIP Mode** (or **PIP/PBP Mode**) is enabled.

— The FreeSync function is only enabled in **HDMI** or **DisplayPort** mode.
Use the HDMI/DP cable provided by the manufacturer when using FreeSync.

— If the FreeSync function is in use and the text displayed on the PC screen looks blurry or corrupted, resolve the issue by changing the resolution of the PC screen to the recommended resolution.

— If the **DisplayPort Ver.** is set to **1.1**, the **FreeSync / FreeSync Premium / FreeSync Premium Pro** mode is disabled.

— If the **DisplayPort Ver.** is set to **1.2**, the **FreeSync / FreeSync Premium / FreeSync Premium Pro** mode is disabled.

If you use the FreeSync function while playing a game, the following symptoms may occur:

- The screen may flicker depending on the type of graphics card, the game option settings, or the video being played. Try the following actions: decrease the game setting values, change the current **FreeSync / FreeSync Premium / FreeSync Premium Pro** mode to **Off**, or visit the AMD website to check your graphics driver's version and update it with the latest one.

-
- While you are using the FreeSync function, the screen may flicker due to variation of the output frequency from the graphics card.
 - The response rate during the game may fluctuate depending on the resolution. A higher resolution generally decreases the response rate.
 - The sound quality of the monitor may be degraded.

— If you encounter any issues when using the function, contact the Samsung Service Center.

— If you change the screen resolution while the function is **On**, the screen may intermittently blank out due to the graphic card. Set **FreeSync / FreeSync Premium / FreeSync Premium Pro** to **Off** and change the resolution.

— The function is unavailable in the devices (e.g. AV devices) that have no AMD graphic card. If the function is applied, the screen may have malfunction.

The models in the Graphics Cards list supports FreeSync

FreeSync can only be used with specific AMD graphics card models. Refer to the following list for supported graphics cards:

Make sure to install the latest official graphics drivers from AMD that support FreeSync.

— For additional AMD graphics card models that support the FreeSync feature, visit the official AMD website.

— Select **FreeSync / FreeSync Premium / FreeSync Premium Pro Off** if you are using a graphics card from a different manufacturer.

— When applying the FreeSync function via the HDMI cable, it may fail to work due to the bandwidth limitation of certain AMD graphics card.

- Radeon™ RX Vega series
- Radeon™ RX 500 series
- Radeon™ RX 400 series
- Radeon™ R9/R7 300 series (excluding R9 370/X, R7 370/X, R7 265)
- Radeon™ Pro Duo (2016 edition)
- Radeon™ R9 Nano series
- Radeon™ R9 Fury series
- Radeon™ R9/R7 200 series (excluding R9 270/X, R9 280/X)

Adaptive-Sync (for NVIDIA graphics card)

— This function may not be supported depending on the model.

Adaptive-Sync technology is a solution that eliminates screen tearing without all the usual lag and latency.

This feature will eliminate screen tearing and lag during game play. Improve your gaming experience.

The displayed **Adaptive-Sync** menu items on the product may vary, depending on the product model and compatibility with the NVIDIA graphics card.

- **Off:** Disable **Adaptive-Sync**.
- **On:** Enable the **Adaptive-Sync** feature with a higher screen frame rate. Screen tearing (abnormal sync between the screen and content) is reduced in this mode. Note, however, that intermittent screen flickering may occur during gameplay.

If you use the **Adaptive-Sync** function while playing a game, the following symptoms may occur:

- The screen may flicker depending on the type of graphics card, the game option settings, or the video being played. Try the following actions: decrease the game setting values, or visit the NVIDIA website to check your graphics driver's version and update it with the latest one.
- When using the **Adaptive-Sync** function, the screen may flicker due to the fluctuation of output frequency from the graphics card.
- The response rate during the game may fluctuate depending on the resolution. A higher resolution generally decreases the response rate.
- The sound quality of the product may be degraded.

— If you encounter any issues when using the function, contact the Samsung Service Center.

— When the resolution is changed while setting **Adaptive-Sync**, the screen tearing can happen intermittently. Set **Adaptive-Sync** to **Off** and change the resolution.

— The function is unavailable in the devices (e.g. AV devices) that have no NVIDIA graphics card. If the function is applied, the screen may malfunction.

— Depending on the source device, 4K output from an AV device is supported only when the **Adaptive-Sync** is **Off**.

— Use the DisplayPort cable provided by the manufacturer when using **Adaptive-Sync**.

— Install the latest NVIDIA graphics card driver to enable **Adaptive-Sync**.

— Use Windows 10 or higher to enable **Adaptive-Sync**.

— If the **Adaptive-Sync** function is in use and the text displayed on the PC screen looks blurry or corrupted, resolve the issue by changing the resolution of the PC screen to the recommended resolution.

— If the **DisplayPort Ver.** is set to **1.1**, the **Adaptive-Sync** mode is disabled.

— If you set the **HDMI Mode** to **1.4**, the **Adaptive-Sync** mode is disabled.

The models in the Graphics Cards list supports Adaptive-Sync

Adaptive-Sync can only be used with specific NVIDIA graphics card models. Refer to the following list for supported graphics cards:

Make sure to install the latest official graphics drivers from NVIDIA that support **Adaptive-Sync**.

— For additional NVIDIA graphics card models that support the **Adaptive-Sync** feature, visit the official NVIDIA website.

— Select **Adaptive-Sync Off** if you are using a graphics card from a different manufacturer.

— When applying the **Adaptive-Sync** function through the DisplayPort cable, it may fail to work due to the bandwidth limitation of certain NVIDIA graphics card.
