Product Description

Professionals with visually demanding workflows want triple monitor support wherever they are working. Most mobile docking stations are limited to single or dual monitor configurations. This leaves desktop docks as the only connectivity option, but desktop docks come with the added inconvenience of being heavy and bulky, especially when accounting for the power brick. Offering more display options to enhance productivity at the desk and reducing the need for dongles and adapters while traveling, the UH1500P EQ USB-C® 5Gbps Triple Video Driverless Mobile Dock supports up to three external displays and allows you to travel with less weight and clutter. Offering a smart and sustainability-focused 9-in-1 design, it uses your laptop's USB-C® power adapter or battery for charging to eliminate an additional power brick and provides multiple ports to streamline file transfers without the need for additional adapters or dongles.

Features

- Support up to Triple 1080p @ 60Hz, Dual 4K @ 60Hz for Windows devices, and Single 4K @ 60Hz for both Windows and MacBook devices.
- Supports Thunderbolt™ 4, USB4®, and USB-C® Alt Mode devices running Windows 10 or later, macOS 11 or later, iPadOS 13 or later, and Samsung DeX®.
- Plug-and-play solution, allowing users to easily transition between different computing environments.
- Contains at least 63% post-consumer recycled (PCR) plastic* – and is delivered in Forest Stewardship Council (FSC®) certified packaging. *Does not include cable.
- Uses the laptop's USB-C® power adapter, or the laptop's battery when traveling – eliminating the need for an additional power brick.
- 9-in-1 design with 5 USB ports allows users to work more efficiently and connect a variety of accessories.
- Compact enough to easily fit into a travel backpack or laptop carrying case, making it ideal for the hybrid worker.
- Free DockWorks™ software ensures the best connection, performance, and security from your dock. *Available for Windows only.
- 2-Year limited warranty.
