

Slim NanoSaver® 2.0 Portable Keyed Laptop Lock

Portable security that won't get in the way.

K65026M

Product Description

The latest laptops from HP, Lenovo and Asus increasingly feature the Kensington Nano Security Slot™, offering all the security and benefits of the standard Kensington Security Slot™, yet 70% smaller. However, these ultra-thin devices may be so slim that while a standard cable lock will fit, the thickness of the lock can be greater than the laptop itself. This prevents the device from lying flat on a surface, making the keyboard and trackpad uncomfortable to use. With connectivity ports placed closer and closer together, a standard lock can also block adjacent ports, compromising functionality. A redesigned version of the innovative Slim NanoSaver® Laptop Lock, the Slim NanoSaver® 2.0 Portable Keyed Lock features a smaller lock head, with the locking cleat positioned low and the key cylinder up high and out of the way. This careful sizing and positioning of components has created a premium locking solution that won't block ports and allows ultra-thin and 2-in-1 laptops with nano lock slots to lie flat and stable. A self-coiling carbon steel cable stretches up to 1.8m (6') and shrinks down to 76mm (3"), making this lock easily transportable. Strength tested and verified for industry-leading standards in torque/pull, foreign implements, lock lifecycle, corrosion and other environmental conditions, the lock is backed by a five-year limited warranty, so you can rest assured knowing you're covered by Kensington, inventor and a worldwide leader in laptop security locks.

Features

- Self-coiling cut resistant carbon steel cable is easily transportable, stretching up to 1.8m (6') and shrinking down to 76mm (3"). Protective sheathing helps keep attachment points such as desks and tables free from scratches.
- Slim Nano lock head design won't interfere with I/O ports or raise the device off its surface.
- Each Kensington lock is precision engineered to meet or exceed rigorous industry standards for strength, physical endurance and mechanical resilience.
- 5mm keying system, common across all of Kensington's latest locks, so there's only one keying system to manage. Smaller key opening helps thwart picking attempts.
- Register & Retrieve™, Kensington's online key registration program that allows for quick, secure and free key replacement if ever lost or stolen.
- Five-year limited warranty, so you can rest assured knowing you're covered by Kensington, inventor and a worldwide leader in laptop security locks.
- Master Keyed allows both the user and administrators to unlock or reset locks at any time.

Specifications

- **Lock Management** Master Keyed
- **Lock Type** Master Keyed
