

# Presentation Remote - Wireless Presenter - 90 ft. (27 m)

Product ID: PRESREMOTE

This presentation remote control helps you deliver seamless presentations by combining intuitive navigation and a laser pointer in a single compact unit.

## Engage your audience

Being confined to your computer isn't the most effective way to deliver a presentation, especially when you're trying to engage your audience.

With a wireless range of 90 ft. (27 m), this presentation clicker puts you in control of what's on your screen, giving you the freedom to move around the room while controlling your presentation as if you were at your computer. This is ideal for presenting in large lecture halls or conference centers.

## Focus your audience's attention

With a built-in laser pointer, the presentation remote lets you guide your audience's attention to critical information in your content. It's perfect for PowerPoint® presentations, websites or any other documents you want to share with your audience.

## Be prepared to travel, with everything you'll need included

The remote control features a sleek, ergonomic design and includes the required batteries along with a protective carrying case, for total portability. You can store the wireless receiver inside the presentation remote when you're not using it. The USB receiver is supported by generic HID drivers ensuring it will work with virtually any Mac or Windows® computer.

The PRESREMOTE is backed by a 2-year StarTech.com warranty and free lifetime technical support.

### Certifications, Reports and Compatibility
