LEXMARK

The smart, high performance home photo printer.

With the Lexmark P915 you can now capture, manage and print stunning borderless photos at home, utilising the latest imaging technology.

For speed and convenience you can enjoy standalone photo printing direct from your PictBridge compatible digital camera or via your camera's memory card - almost instantly! And the large 2.5" colour LCD screen makes selecting and previewing your photos easy. Plus exclusive Lexmark Imaging Studio software lets you effortlessly use photo editing features such as red-eye reduction, cropping, re-sizing and one-click automatic image enhancement.[†]

The compact P915 is stylish, functional and user-friendly - with softer curves; a distinctive design; an attractive paper guard; a fully featured, centred operator panel and colour-coded buttons that let you quickly and easily control a host of functions.

[†] When attached to your PC.

Print

- Up to 22 ppm mono and up to 15 ppm colour[†]
- 4800 dpi print resolution and 6-colour photo printing
- Prints beautiful borderless 4" x 6" prints in as fast as 38 seconds*
- Prints photos without a PC from your PictBridge compatible camera or your digital camera memory card
- Features Accu-Feed™ paper handling system which virtually eliminates paper jams

Creating perfect pictures is automatic.

Producing perfect pictures with the Lexmark P915 has never been easier thanks to industry leading software.

Red-eye Reduction

Included Lexmark software uses intelligent facial recognition technology to automatically find the faces in images and then adjust the red-eye pixels to reduce red-eye. This feature is particularly useful when taking photos at night or indoors.

The P915 finds the problem "red eyes"...

...and removes them to create the perfect picture.

Exif Print

Exif Print allows you to print photos more accurately by using the shooting information recorded by the digital camera, and faithfully matching it in the print.

Exif Print

Software that does all the hard work for you.

The Lexmark P915 is a complete photo printing package with world class software that makes easy work of every task.

- The P915 Launch Pad (below left) combines with the Photo Imaging Studio software to make commonly used functions visible, accessible and fully integrated.
- The user-friendly software features intuitive picture icons, large buttons and clear descriptive language.

- Plus with Lexmark Fast Pics software (above right), simple on-screen directions and icons get you on the fast path to printing digital images.
- Fast Pics also includes Memory Card Manager for quickly and easily managing digital photos.

Lexmark P915 Features:

2.5" Colour LCD - Lets you preview and select images prior to printing. Also keeps you up-to-date with the printer's status.

Paper Protector - Protects your device by keeping dust, coins and paper clips out of the paper feeder.

Digital Media Hub - This card slot dust cover helps keep the card connections free of contaminants.

PictBridge - A connection that allows you to print photos instantly by simply plugging your digital camera directly into the printer.

Animated Cartridge Help - The LCD features animated cartridge replacement 'help' visuals which make loading and positioning cartridges fast, simple and easy.

Photo Timer - The print countdown timer display lets you know when your job will be completed.

Printing in 3 steps.

Sharing files has never been so easy.

Innovative Lexmark software also makes easy work of using, managing and sharing both documents and images.

- Productivity boosting software lets you manage photos and documents and attach images to email.
- Plus advanced photo software lets you get creative with images by adding text, adjusting colour, cropping, flipping and adjusting contrast.

The P915 supports the following Media Cards:

Compact Flash Type I & II	Memory Stick (MS)
Microdrive	Smart Media (SM)
Multi Media Card (MMC)	xD
Secure Digital (SD)	

*When printing in QuickPrint mode and excluding processing time.

Revolutionary inks for long-lasting vibrant memories.

Lexmark's industry-leading Evercolor Ink is a unique 6-colour hybrid ink system which combines the best of pigmented inks and dye-based inks to create brilliant results.

- Evercolor inks deliver a wider colour selection, vibrant colours, sharp text and graphics and superior printing on both plain paper and glossy paper.

- Evercolor optimised inks are extremely fade resistant, making them ideal for archiving.
- In fact, when printed on Lexmark photo paper - photos produced using Evercolor inks will last up to 65 years* in a frame or 200 years* in an album.

- Plus this improved technology lets you enjoy vibrant 6-colour photo printing, by automatically optimising the colour table from 4-colour to 6-colour.

*Longevity claims are based on accelerated testing of photos displayed indoors, under glass or in photo albums printed on Lexmark Premium Photo Paper.

When it comes to speed and sharpness, size is everything.

The new range of sophisticated Lexmark cartridges boast variable drop size technology for improved speed and precision.

- The printer detects the type of document being printed and then automatically selects the larger printhead nozzles for quickly covering large areas.
- While the small cartridge nozzles are selected to deliver the ink more precisely for accurate and detailed photo quality prints.
