

USB-C to VGA Video Adapter with USB Power Delivery - 2048x1280

StarTech ID: CDP2VGAUCP

This USB-C™ to VGA adapter lets you connect your laptop or MacBook with USB Type-C™ to a VGA display. The video adapter features USB Power Delivery, which enables you to provide power to your laptop while you're outputting video to a VGA display.

USB Type-C is a universal connectivity standard that combines all of your essential functions into one dynamic port. This adapter works with USB-C devices that pass a DisplayPort video signal, such as the MacBook and Chromebook Pixel™. It's also compatible with Thunderbolt™ 3 ports.

Charges your laptop

Unlike some video adapters that take up your laptop's USB-C charge port while you're outputting video and prevent you from charging your computer, this video adapter supports USB Power Delivery and features an additional USB-C port. This means you can charge your laptop, even while outputting video, by simply connecting the laptop's power adapter to the additional port. It's the perfect solution for laptops that only have a single USB-C port.

Promotes portability

This USB Type-C video adapter maximizes portability with a lightweight, small-footprint design. It's the perfect accessory to carry with your MacBook or Chromebook, fitting easily into your laptop bag or carrying case. Its ultra-portable design makes this adapter perfect for BYOD (Bring Your Own Device) applications at the office.

Connects easily

USB Type-C is a reversible connector, so no matter how you plug it in, the adapter will always connect. This saves you the hassle and embarrassment of struggling with your device while you're trying to deliver a presentation or sharing information.

Maintains crystal-clear picture quality

The adapter supports video resolutions up to 2048x1280 (60Hz), easily supporting your 1080p or 720p high-definition monitors, projectors or TVs. You'll be surprised at the picture quality the adapter provides, even when it's connected to a legacy VGA display. The adapter harnesses the video capabilities that are built into your USB Type-C connection to deliver every detail in stunning high definition.

The CDP2VGAUCP is backed by a 2-year StarTech.com warranty and free lifetime technical support.

Applications

- Charge your USB Type-C laptop and output video using the same USB-C port
- Carry the adapter with you when you travel, and connect to any VGA monitor, TV, or projector
- Connect to BYOD (Bring Your Own Device) and CYOD (Choose Your Own Device) workstations at your office

Features

- Charge your laptop and output VGA video at the same time using the same USB-C port, with USB Power Delivery
- Hassle-free connection using the reversible USB-C connector
- Maximum portability with a small footprint and lightweight design
- Thunderbolt 3 port compatible
- Crystal-clear picture quality with support for high-definition video resolutions up to 2048x1280 @ 60Hz
