

4XEM 10FT DVI-D Single Link M/M Digital Video Cable

4XEM Part- 4XDVISMM10FT

With a high speed digital interface of up to 4.95 Gbits per second, 4XEM DVI-D Single Link cables provide a highly reliable, purely digital connection between video devices such as DVI monitors, projectors and more. Two nickel plated DVI-D (male, single link) connectors ensure minimal signal loss while high quality materials and construction, including 28 AWG copper conductors, provide a lifetime of dependable performance. Connect with the best.

The added length gives you way more flexibility.

4XEM gear is respected industry wide for its high performance, premium quality and durability.

- Compliant with Asus VS248H-P / ViewSonic VX2770SMH-LED / BenQ XL2420Z / HP Pavillion C3Z97AA#ABA
- Available for use with all Digital Flat Panels and Liquid Crystal Displays
- Signal attenuation is faster and stronger than a regular monitor cable
- Resolutions up to 1920x1200
- Works with PC and Mac computer systems
- DVI-D Single Link Display Cable allows digital displays only

Application

- Home office
- Small business
- Home Theatre
- Networking
- Desktop

DVI (Digital Video Interface)

- Successor to VGA DB15 connector
- Can be analog or digital
- Approx 9 different types of DVI connector are NOT ALWAYS INTERCHANGEABLE!

DVI-D:

A digital only connection with no analog conversion. This is the best cable when seeking to connect a digital source to a digital display. Does not work with analog displays.

DVI-I:

Digital cables capable of transmitting either a digital to digital or an analog to analog signal. This cable will work with both digital and analog displays and sources.

DVI-A:

Used to carry a DVI signal to an analog display. There is a noticeable loss of quality when converting digital to analog.
