

# TROY Locking Printers

## Protect Your Valuable Stock.

### Who's it for?

Ideal for organizations with **printers in open areas that are accessible to multiple people** including patients, customers, or even employees.

Implementing a locking printer solution can drastically **reduce the risk for corruption, fraud, or forgery.**

### Prevent Theft

Protect important security stock such as checks/money orders, diplomas, vital records, and other high-value paper.

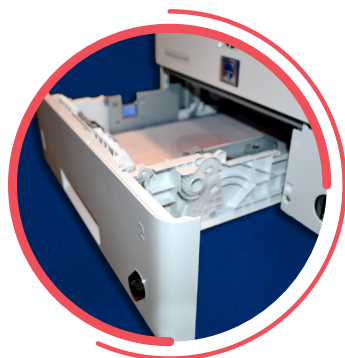

### Minimize Financial Loss

Small, proactive steps now reduce your risks of financial loss down the road.

### Protect Your Reputation

Prevent fraud that could surely harm your reputation far faster than you built it.

### Custom-fit Locking Paper Trays

Locks are engineered to fit each specific printer model. With three variations to choose from, you can meet unique processes of your office.

Standard

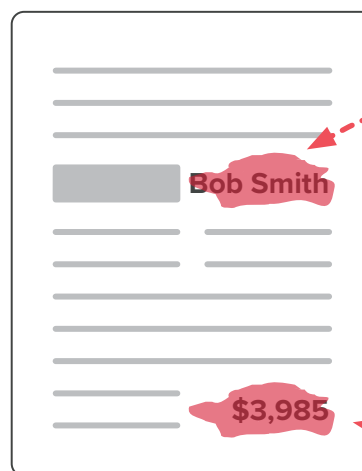

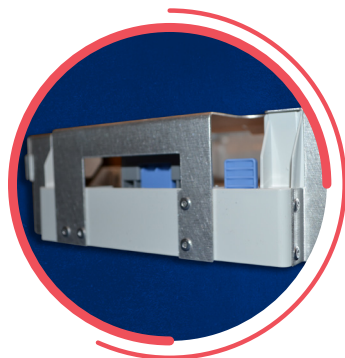

Barrel

Combination

### Metal Tray Shielding

Rugged sheet metal prevents access to the back of the printer. This second protective layer is necessary to prevent alternative methods of paper theft.

### Patented Anti-tamper Security Agent

Protect sensitive data such as names and amounts on any document.

### Security Toner\*

Protect the document after it's been printed with **The World's Most Fraud Resistant Toner.**

The secret is a patented anti-tamper security agent which releases a red dye if chemical alteration is attempted, rendering the altered document null and void.

\*Alternative - Choose this option at the time of purchase.
