

**Compact, colourful
business printing**

**Compact design,
expertly engineered**

The space-saving, colour business LED range that quietly delivers professional quality documents without compromising on speed

This line up combines professional performance with fast print speeds, minimal maintenance, and long-lasting supplies to keep your business moving.

Featuring the latest industry-standard security, alongside the flexibility to tailor the device to suit you and your business, you can be confident that this range meets the needs of the most demanding office.

Professional Compact Colour LED printer range

Quiet without compromise

With its streamlined design, the range is engineered to print quietly whilst delivering speeds up to 25% faster than the previous generation. So you can print continuously without distraction and focus on your business.

Compact and expertly engineered

Designed by experts, our most compact, professional colour multifunction printer delivers high-quality outputs every time, allowing you to make the most of your office space. Every component has been optimised to reduce the overall size of the device without compromising on performance.

With easy paper access, the range has been developed for high print volume to meet the needs of a busy office.

Flexibility that saves time

Our most compact, professional colour range has been designed to seamlessly fit into your office space, whilst meeting the specific print requirements of your business. By adding an optional paper tray, it gives you the flexibility to increase the amount your business can print from the one device.

Secure by design

To keep pace with the ever-evolving legislation on privacy and data security, our devices offer the latest industry-standard security features to securely protect your data.

At Brother we put print security first. All our products are 'secure as standard' using triple-layer security at a network, device and document level, with a range of robust features that means data is only ever seen by those it is meant for.

With businesses shifting towards Zero Trust environments, we know that security is your highest priority. The evolving nature of security means that our security experts continuously research new enhancements to products, solutions and services to proactively ensure all our products are secure by design.

Our professional compact colour range provides business level security verified through external security certification, offering added peace of mind that your documents remain safe and secure. All devices come with a flexible suite of security features and solutions that can be tailored to your business, enabling you to easily audit, control and manage your fleet of devices securely.

All devices come with a flexible suite of security features and solutions that can be tailored to your business

Your device protects your business by reducing its attack surface through:

Restricting user access

By using LDAPS, Windows Active Directory together with NFC authentication, only authorised users are able to access the device.

Restricting privileges at a device level

With Secure Function Lock and Setting Lock, only authorised users are permitted access to specific functions.

Maintaining device integrity

With runtime intrusion detection, Secure Boot, digitally signed firmware and end-to-end encrypted connections, devices are always performing at their optimum level of security.

Your network is protected with flexible industry standard features and management tools including:

Intrusion protection

With protocol management, interface restrictions and IPV4 filtering, you have the flexibility to adapt device settings to your business.

Secure connection

Securely connect to enterprise level wired and wireless networks through industry standard IEEE 802.1X.

Secure encrypted communication

By using flexible industry standards such as TLS, SSH, IPSEC, HTTPS and SNMP3, your business can tailor the device to its network.

Easily manage and configure your security profile

Using Device Master Settings, BRAdmin Pro 4 and Mass Deployment Tool, your business can apply settings to entire fleets of devices.

Audit your devices

Using SIEM integration through Syslog, you can gather real time usage information on your devices.

Your documents are protected through encryption, storage protection and secure print solutions including:

Encrypted document transfer

When you send your print data from your computer to the device, IPPS/HTTPS encryption ensures your data is secure and unreadable.

Secure scan data transfer

Whether you are scanning to your local network or over the internet via Web Connect or a cloud-based service, your data is protected using TLS, HTTPS, SFTP (SSH).

Non-persistent internal memory

All print job data is automatically wiped during a reboot and data is purged, ensuring no information is left on the device.

Secure print release

Using a Brother secure print solution, documents are only released when you are ready to print and collect them.

3rd party integration

Through Brother Solutions Interface (BSI), our devices can be fully integrated with trusted 3rd party partners such as Kofax and YSoft, which adds an extra layer of security to your business.

Solutions ready

Automate workflows and improve business processes and security with print management solutions.

Brother offers a suite of document management, security and workflow solutions which can be added to devices. These provide additional professional features to improve your business processes.

Unlock new possibilities

Workflow Solutions

Personalised touchscreen

Improve efficiency by making frequently used functions more accessible by showing and hiding specific shortcuts. Simply log in to the device and have your individual user based shortcuts on the home screen.

Barcode printing

With Barcode Print+, simply supply your printer with the information for the barcode. The printed 2D and 3D barcode is easily read by a variety of barcode readers and scanners.

Automatically route documents

Reduce the labour-intensive task of scanning several documents, saving and renaming them. Barcode Utility means that documents with a barcode can be scanned and automatically saved to the required location, automating the separation of a batch of documents and routing each individual file to the designated folder on your network.

Security Solutions

Secure Print Release

Secure Print+ enables you to print your confidential business documents securely. Your sensitive documents are only printed when you are ready to collect them from the printer. Only authorised staff can collect their documents and users are easily added and removed.

Device management

Remote support

Remote Panel operates in real-time, offering a complete interactive interface to your printing device. Your IT provider can access the full functionality of your printer, to quickly diagnose and resolve any issues and enable settings to be changed as if they were physically standing at the printer.

Automatic diagnostics

Request Help is a Brother service that enables your IT administrator or service provider to easily troubleshoot errors that may occur. You simply press the 'Request Help' icon on the control panel and a full diagnostic report is created and automatically emailed to your IT administrator.

Order supplies from your printer

Effortlessly order your toner cartridge supplies directly from your printing device, with the Order Supplies service. In one touch, your selected supplier will be notified when you require replacement supplies and arrange delivery, ensuring you never run out of toner when you need it.

Brother solutions do not come as standard on all devices. For more information on how to access these solutions please contact your local dealer

KOFAX

YSOFT

Automate workflows and improve business processes and security with print management solutions.

You have the option to upgrade your device with intelligent Brother and third-party solutions, including integration with industry leading providers Kofax and YSoft giving you complete flexibility in how you manage, secure and control your documents.

Brother Original supplies are made with you in mind, guaranteeing you effortless performance and long term cost savings.

Dedicated to remanufacturing and reducing CO₂

Our processes mean that 100% of the Brother cartridges you send back to us are remanufactured or recycled. Absolutely nothing goes to landfill and hasn't since 2013.

We are regularly investing in more sustainable products by working towards the circular economy principles of reduce, reuse, refurbish, repair and recycle with zero waste to landfill.

Dedicated carbon neutral remanufacturing facilities support our free cartridge return and recycle scheme. Every year, we remanufacture or recycle 3 million toner cartridges.

By remanufacturing 86% of our toner cartridges and each cartridge saving on average 33% of CO₂, we save around 4,500 tonnes of CO₂ each year. In doing this, we are able to support your company in reducing its carbon footprint and can provide you with an annual certificate showing the amount of CO₂ you have saved when returning cartridges via the bulk returns scheme.

Figures correct as of April 2022 - March 2023

Zero waste to landfill

Our European recycling facilities have been zero waste to landfill accredited since 2013 - stopping 1,500 tonnes of material from ending up in landfill every year.

Our commitment to local communities

Our Vietnam manufacturing facilities received Responsible Business Alliance (RBA) Gold certification, for our commitment to fulfilling our social responsibilities through the establishment of sustainable supply chains.

RBA's code of conduct sets out standards to ensure that working conditions are safe, that workers are treated with respect and dignity, and that business operations are conducted environmentally responsibly and ethically.

COOL EARTH

As well as our market-leading, carbon-neutral toner remanufacturing program, we have been partners with global charity, Cool Earth for well over a decade. A UK-based non-profit organization, Cool Earth helps protect endangered rainforest, combats against climate change and provides employment for local people.

Together, we have supported 7 communities across Papua New Guinea and the Peruvian Amazon in protecting around 70,000 hectares of rainforest from deforestation. As custodians of this land, these local communities have kept almost 27 million trees standing which absorb and store over 38 million tonnes of CO2 from the earth's atmosphere.
