Packaging

100% of HP paper-based packaging is from recycled or certified sustainable sources⁶

1. Percentage of ocean-bound plastic contained in each component varies by product. Ocean Bound plastic is expressed as a percentage of the total weight plastic. Ocean Bound plastic is based on the definition set by the UL2809 standard.
2. Recycled metal is expressed as a percentage of the total weight of the metal according to ISO 14021 definitions for metal parts over 25 grams.
3. Recycled plastic is expressed as a percentage of the total weight plastic. Post-consumer recycled is based on the definition set in the EPEAT standard for computers, IEEE 16801-2018 standard.
4. Based on US EPEAT[®] registration according to IEEE 16801-2018 EPEAT[®]. Status can vary by country. Visit www.epeat.net for more information.
5. ENERGY STAR[®] and the ENERGY STAR[®] logo are registered U.S. marks.
6. HP paper and fiber based packaging for PCs, displays, home and office print, and supplies is reported by suppliers as recycled or certified, with a minimum of 97% by volume verified by HP. Packaging is the box that comes with the product and all paper-based materials inside the box. Packaging for personal systems accessories and spare parts is not included
