

FUNCTION SETUP GUIDE		Function	LCD Display	Options	Default	Description
ON/OFF	Power On: To turn the UPS on, push the POWER button and you will hear a beep. Power Off: To turn the UPS off, push the POWER button again. Setup Mode:	Sensitivity	INFUT (AUTRUT) ESTIMATE RUPETINE SENS	Low Medium High ESC	Medium	If the connected equipment can tolerate more power events (e.g. Receiving the unstable input voltage from a generator), select Low Sensitivity. The UPS will go to Battery Mode less often. If the connected equipment is more sensitive to power events, select High Sensitivity. The UPS will go to Battery Mode more often.
\bigcirc	Press the SELECT Button for approximately 3 seconds to access the setup mode's 9 functions: Sensitivity, LCD Display ON/OFF, Self Test, Utility Power, MAX O/P Voltage, MIN O/P Voltage, Audible Alarm, Back to Default Settings, and Back to Status Display. Use the same button to select the functions to configure.	LCD Display On / Off			Lcd 0	If Lcd 0 is selected, the LCD display will shut off after 60 seconds if there is no activity. If Lcd 1 is selected, the LCD display will stay illuminated. Note: In Battery mode, the LCD is always on regardless if the setting is Lcd 0 or Lcd 1.
SELECT	Select Function: When a function is selected, press SELECT Button for 3	Self Test	INPUT OUTPUT ESTIMATE RUNCTIME	YES ENDER EXEMPLEMENTED YES ESC ESC	No	In Line Mode, select YES to perform a Self Test on the battery.
	 seconds to view the options. Confirm Option: Press the SELECT Button: When an option is selected, press the SELECT Button for 3 seconds. After the setting has been confirmed, the LCD screen will go back to the Function Menu. Wait 8 seconds: When an option is selected, you can wait 8 seconds for the setting to be confirmed. After the setting has been confirmed, the LCD screen will leave the setup mode and go back to the status display. Escape Function (ESC) Option Menu: You can select this option and press the 	Utility Power	(CUSt)* * Only when MIN or MAX O/P Voltage is configured.	Poor (98V~142V)	Normal	This function determines how the UPS will switch to Battery Mode. 3 different output voltage ranges can be chosen according to the quality of the AC utility service in your location. If your utility service is not stable, you can select Poor (98V~142V). The unit will go to Battery Mode less often to tolerate the utility power fluctuations. If your utility service is stable, you can select Good (102V~138V). The unit will go to Battery Mode more often.
	 SELECT Button for 3 seconds to go back to the Function Menu. Function Menu: You can select this option and press the SELECT Button for 3 seconds to go back to the status display. 			2		

MAX O/P Voltage		H138~H142	2	H140	In Utility Power settings, only 3
					types of fixed voltage ranges could
		ESC			be chosen. However, you can fine
	·				tune the MAX O/P voltage in this
	INPUT OUTPUT ESTIMATE RUN_TIME				function.
	H 140				If the utility voltage is usually high
					and the connected equipment can work in this condition, you can set
					the output voltage range higher to
					reduce the UPS from going to
					Battery mode as often.
MIN O/P Voltage		L98~L102		L100	In Utility Power settings, only 3
					types of voltage ranges could be
		ESC			chosen. However, you can fine
	INPUT				tune the MIN O/P voltage in this function.
	L 100				If the utility voltage is usually low
					and the connected equipment can
					work in this condition, you can set
					the output voltage range lower to
					reduce the UPS from going to AVR
Audible Alarm		b On	INFUT FUTFUT ESTIMATE NUTLINE	b On	Mode or Battery Mode as often. If b OFF is selected, the unit will
		0.011	6 ON	0.011	mute all alarms and the SILENT
	INPUT	b OFF	INFUT OUTFUT ESTRATE RUN, TIME		MODE icon will appear on the LCD
	6 00				display.
