Chapter 1. Getting started

This User's Guide provides detailed operation instructions for the user. For quick instruction overview, please see the Setup Poster for brief information.

T24-4v supports Lenovo Accessories and Display Manager-**ThinkColour**.

Shipping contents

The product package should include the following items:

- Information Flyer
- Flat Panel Monitor
- Power Cord
- HDMI Cable
- USB A-B Cable
- Base
- Stand

*: Depending on many factors such as the processing capability of peripheral devices, file attributes, and other factors related to system configuration and operating environments, the actual transfer rate using the various USB connectors on this device will vary and is typically slower than the data rates as defined by the respective USB specifications: - 5 Gbit/s for USB 3.1 Gen 1; 10 Gbit/s for USB 3.1 Gen 2 & 20 Gbit/s for USB 3.2.

Notice for use

To set up your monitor, please see the illustrations below.

Note: Do not touch the monitor within the screen area. The screen area is glass and can be damaged by rough handling or excessive pressure.

1. Take out the Top cushion and accessories.
2. Mounting the stand to monitor's recess.
 - Insert the three tabs on the upper part of the stand to the groove on the back of the monitor.
 - Press the stand down till it snaps into place.
3. Insert the base towards the stand and tighten the thumbscrew.
4. Stand up the monitor with both hands carefully.

Note: To install a VESA mount, please see "Wall Mounting (Optional)" on page 2-15.

Product overview

This section will provide information on adjusting monitor positions, setting user controls, and using the cable lock slot.

Side and top view

No.	Name
1	Audio jack
2	USB 3.2 Gen 1 Type-A downstream port
3	USB-C downstream port
4	Stand release button
5	Camera

***: Preventing Oil Residue on Camera Lens**

To ensure optimal image quality, please avoid touching the camera lens directly with your fingers. Oil and dirt from skin contact may accumulate on the surface, causing blurring, glare, or reduced clarity in photos/videos.

***: Very bright environments or fast-moving subjects will impact HDR Performance.**

Back View

No.	Name
1	Power On/Off button
2	Function buttons
3	Cable management slot
4	VESA mounting holes (100 mm x 100 mm)
5	Regulatory label
6	Power connector
7	Cable lock slot
8	DP1.2 port
9	HDMI 1.4 port
10	VGA port
11	USB 3.2 Gen 1 Type-B upstream port
12	USB 3.2 Gen 1 Type-A downstream port
13	USB 3.2 Gen 1 Type-A downstream port

Types of adjustments

Tilt

Please see the illustration below for an example of the tilt range.

Swivel

With the built-in pedestal, you can tilt and swivel the monitor for the most comfortable viewing angle.

Height Adjustment

For height adjustment, user needs to press down or lift up the monitor.

Monitor pivot

- Adjust the screen position before rotating the monitor screen. (Make sure that the monitor screen ascent to its highest point, and it inclines backward at 23.5°.)
- then rotate clockwise /counterclockwise until the monitor stops at 90°.

Camera Swivel

Please see the illustration below for an example of camera swivel range.

Monitor controls

The keypad controls on the back cover are accesses to various functions.

For information on how to utilize these keypad controls, please see “Adjusting your monitor image” on page 2-3.

Cable lock slot

Your monitor is equipped with a cable lock slot located on the rear of your monitor

IR-Camera

Your monitor has embedded integrated IR Camera Module; it can be used as a normal web-camera.

Slide the camera shutter open or close to enable/disable the camera.

a. Slide to open.

b. Slide to close.

Note: Camera function support Windows 10/Windows 11.

Windows hello

After setting up the “Windows hello” application, you can login your Windows 10 or Windows 11 operating system with the function of face-recognition.

Note: To set up “windows hello”, please see “Windows Hello setup” on page 1-15.

Setting up your monitor

This section provides information on how to set up your monitor.

Connecting and turning on your monitor

Note: Be sure to read the Safety information on page iv before carrying out this procedure.

1. Power off your computer and all attached devices, and unplug the computer power cord.

Note: The type of plug & Socket shown here are for illustration only.

2. Connect the cables according to below icon indication.

3. For computer in DisplayPort connecting.
For other regions Lenovo recommends that customers who require to use the DP Cable on their monitor purchase the "Lenovo DisplayPort to DisplayPort Cable 0A36537"
[www.lenovo.com/support/monitor accessories](http://www.lenovo.com/support/monitor%20accessories).

-
4. For computer in HDMI connecting.
Lenovo recommends that customers who require to use the HDMI input on their monitor purchase the "Lenovo HDMI to HDMI cable OB47070"
www.lenovo.com/support/monitor_accessories.

HDMI

5. For computer in Analog Signal Cable connecting.

6. Connect one end of the USB cable to the USB upstream terminal on the back of the monitor, and connect the other end of the USB cable to an appropriate USB port on your computer.

SS *

* If there are any * tag, you can consult the comments on page 1-1.

-
7. Connect one end of the USB cable to the USB downstream terminal on the side & back of the monitor, and connect the other end of the USB cable to an appropriate USB port on your device.

Note: The USB downstream port does not provide power while the monitor switch is off.

Below USB A port, 5V/0.9A

Left USB A port, 5V/0.9A

SS  *

8. Connect your USB-C device.

Note: USB type C port 5V/3A

SS  *

* If there are any * tag, you can consult the comments on page 1-1.

-
9. Insert the power cord into the monitor, then plug the monitor power cord and the computer cord into grounded electrical outlets.

Note: A certified power supply cord has to be used with this equipment. The relevant national installation and or equipment regulations shall be considered. A certified power supply cord not lighter than ordinary polyvinyl chloride flexible cord according to IEC 60227 (designation H05VV-F 3G 0.75mm² or H05VVH2-F2 3G 0.75mm²) shall be used. Alternative a flexible cord be of synthetic rubber according to IEC 60245 (designation H05RR-F 3G 0.75mm²) shall be used.

10. Connect the cables with cable clip.

11. Power on the monitor and the computer.

12. When you install the monitor driver, download the driver that corresponds to your monitor model from the Lenovo website https://pcsupport.lenovo.com/solutions/t24_4v. Refer to the “Manually installing the monitor driver” on page 3-5 section to install the driver.

Windows Hello setup (Windows 10)

Note: To set up “Windows Hello”, do the following:

1. Press “Windows” + “I” and then click Accounts, choose “Sign-in options”.

2. Setup PIN number.

3. Establish face-recognition by clicking Set up, Get started.

4. Scanning your face information and enable face-recognition to unlock your computer.

Windows Hello setup (Windows 11)

Note: To set up “Windows Hello”, do the following:

1. Press “Windows” + “I” to enter system configuration.
2. Press “Windows” + “I” and then click Accounts, choose “Sign-in options”.

3. Setup PIN number.
4. Establish face-recognition by clicking Set up, Get started.

5. Scanning your face information and enable face-recognition to unlock your computer.

Registering your option

Thank you for purchasing this Lenovo product. Please take a few moments to register your Product and provide us with information that will help Lenovo to better serve you in the future. Your feedback is valuable to us in developing product and services that are important to you, as well as in developing better ways to communicate with you. Register your option on the following Web site:

<http://www.lenovo.com/register>

Lenovo will send you information and updates on your registered product unless you indicate on the Web site questionnaire that you do not want to receive further information.

Chapter 2.Adjusting and using your monitor

This section will give you information on adjusting and using your monitor.

Comfort and accessibility

Good ergonomic practice is important to get the most from your personal computer and to avoid discomfort. Arrange your workplace and the equipment you use to suit your individual needs and the kind of work that you perform. In addition, use healthy work habits to maximize your performance and comfort while using your computer. For more detailed information on any of these topics, visit the Healthy Computing Web site at:

<http://www.lenovo.com/healthycomputing/>.

Arranging your work area

Use a work surface of appropriate height and available working area to allow you to work in comfort.

Organize you work area to match the way you use materials and equipment. Keep your work area clean and clear for the materials that you typically use and place the items that you use most frequently, such as the computer mouse or telephone, within the easiest reach.

Equipment layout and setup play a large role in your working posture. The following topics describe how to optimize equipment setup to achieve and maintain good working posture.

Positioning and viewing your monitor

Position and adjust your computer monitor for comfortable viewing by considering the following items:

- **Viewing distance:** Recommended viewing distance between the eye and the monitor screen is 1.5 x the diagonal of the screen. Solutions in meeting this required distance in cramped office situations include pulling desk away from wall or divider to make room for monitor, using flat panel or compact displays placing the monitor in the desk corner, or placing the keyboard in an adjustable drawer to create a deeper working surface.
- **Monitor height:** Position the monitor so your head and neck are in a comfortable and neutral (vertical, or upright) position. If your monitor does not have height adjustments, you might have to place books or other sturdy objects under the base of the monitor to achieve the desired height. A general guideline is to position the monitor such that the top of the screen is at or slightly below your eye-height when you are comfortably seated. However, be sure to optimize your monitor height so the line of site between your eyes and the center the monitor suits your preferences for visual distance and comfortable viewing when your eye muscles are in a relaxed state.
- **Tilt:** Adjust the tilt of your monitor to optimize the appearance of the screen content and to accommodate your preferred head and neck posture.
- **General location:** Position your monitor to avoid glare or reflections on the screen from overhead lighting or nearby windows.

The following are some other tips for comfortable viewing of your monitor:

- Use adequate lighting for the type of work you are performing.
- Use the monitor brightness, contrast, and image adjustment controls, if equipped, to optimize the image on your screen to meet your visual preferences.
- Keep your monitor screen clean so you can focus on the screen's contents.

Any concentrated and sustained visual activity can be tiring for your eyes. Be sure to periodically look away from your monitor screen and focus on a far object to allow your eye muscles to relax. If you have questions on eye fatigue or visual discomfort, consult a vision care specialist for advice.

Quick tips for healthy work habits

The following information is a summary of some important factors to consider to help you remain comfortable and productive while you use your computer.

- **Good posture starts with equipment setup:** The layout of your work area and the setup of your computer equipment have a large effect on your posture while using your computer. Be sure to optimize the position and orientation of your equipment by following the tips outlined in "Arranging your work area" on page 2-1 so you can maintain a comfortable and productive posture. Also, be sure to use the adjustment capabilities of your computer components and office furniture to best suit your preferences now and as your preferences change over time.
- **Minor changes in posture can help avoid discomfort:** The longer you sit and work in front of your computer, the more important it is to observe your working posture. Avoid assuming any one posture for an extended period of time. Periodically make minor modifications in your posture to help deter any discomforts that might arise. Make use of any adjustments that your office furniture or equipment provide to accommodate changes in posture.
- **Short, periodic breaks help ensure healthy computing:** Because computing is primarily a static activity, it is particularly important to take short breaks from your work. Periodically, stand up in front of your work area, stretch, walk for a drink of water, or otherwise take a short break from using your computer. A short break from work gives your body a welcome change in posture and helps to ensure you remain comfortable and productive while you do work.

Accessibility information

Lenovo is committed to providing greater access to information and technology to people with disabilities. With assistive technologies, users can access information in the way most appropriate to their disability. Some of these technologies are already provided in your operating system; others can be purchased through vendors or accessed at:

https://lenovo.ssbartgroup.com/lenovo/request_vpat.php

Adjusting your monitor image

This section describes the user control features used to adjust your monitor image.

Using the direct access controls

The direct access controls can be used when the On Screen Display (OSD) is not displayed.

Table 2-1. Direct access controls

	Icon	Name	Description
 		Menu/OK:	• Press to open main menu while there is no OSD on the screen. • Press to enter next level on main menu or sub menu , or move backwards through the sub menus. • Press and hold for 10 seconds to Lock/un-Lock all menu.
		Right key	• It is a shortcut for adjusting Color mode while there is no OSD on the screen. • Press to enter sub menu. • Press to adjust current values on adjustment bar.
		Left Key	• Return to the previous menu page or exit OSD menu. • Press to adjust current values on adjustment bar.
		Down Key	• Press to move lighting-indicator on main menu down to next one. • Press to choose first OSD item When lighting-indicator is on the last OSD item. • Press to decrease current values on adjustment bar. • It is a shortcut for adjusting Scenario mode selection while there is no OSD on the screen. • Press and hold for 3 seconds to Enable/Disable Conference/ Meeting indicator.
		Up Key	• Press to move lighting-indicator on main menu up to last one. • Press to choose last OSD item When lighting-indicator is on the first OSD item. • Press to increase current values on adjustment bar. • It is a shortcut for adjusting Brightness while there is no OSD on the screen.
		Source-selecting	It is a shortcut for changing input signal while there is no OSD on the screen or on power-saving mode.
		DDC-CI	Press and hold for 10 seconds to Enable/Disable the "DDC/ CI".
		Power button	Turns the monitor on/off. White indicates power on. Orange indicates standby/ power saving mode.

	Icon	Name	Description
1		Phone hook	• LED will blink in green when there is an incoming call. • LED will light up in static green during call. • Short press to answer / end call. Note: This feature can only be used with the Teams app.
2		Volume down	• Short press to decrease volume. • Long press the volume to continuously decrease.
3		Volume Up	• Short press to increase volume. • Long press the keep volume up.
4		Mute Mic	• Press to mute and unmute the microphone. • When the microphone is muted, the LED lights up static red. • LED switches off when microphone is enabled/ unmuted.

Using the On-Screen Display(OSD) controls

To adjust the settings, the user controls can be viewed through the OSD.

To use the controls:

1. Press  to open the main OSD menu.
2. Use Δ or ∇ to move among the icons. Select an icon and press $\leftarrow$ to access the selected function. If there is a sub-menu, you can move between options using Δ or ∇ , then press $\leftarrow$ to select that function. Use Δ or ∇ to make adjustments then press $\leftarrow$ to save.
3. Press $\leftarrow$ to move backwards through the sub-menus and exit from the OSD.
4. Press and hold $\leftarrow$ for 10 seconds to lock the OSD. This will prevent accidental adjustments to the OSD. Press and hold $\leftarrow$ for 10 seconds to unlock the OSD and allow adjustments to the OSD.
5. Enables DDC/CI by default. Use OSD Exit Key, Press and hold  for 10 seconds to disable/enable DDC/CI function. A message "DDC/CI disable" is shown on the screen.
6. When a VGA signal is connected, the timing parameters of the analog signal, including Image Position (H/V position), Clock, and Phase, can be stored in up to 23 sets of data.
7. The ENERGY STAR option resets all user settings to default values so that the monitor can meet the requirements of Energy Star.

Energy Star is an energy saving program for consumer electronics led by the U.S. government. It was launched in 1992 by EPA and DOE to reduce energy consumption and greenhouse gas emissions. Energy Star logo is a symbol of energy conservation and environmental protection. It improves the concept of energy efficiency of consumers and manufacturers, and effectively guides the market.

The regulation of Energy Star improves energy efficiency and reduces air pollution by using more energy-efficient equipment in homes, offices and factories. One way to achieve this goal is to use management to reduce energy consumption when products are not in use. The default settings for monitors conform to Energy Star certification. Any changes by users for more features and functionalities may increase power consumption, which will exceed the limitation of Energy Star's standard. If the user changes the options related to energy efficiency when using, such as brightness, color mode, etc., select All

Reset Factory or choose the Energy Star option, the power consumption will be restored to the energy efficiency with Energy Star standard.
 For more information, please refer to (www.energystar.gov/products).
 All products of Energy Star will be posted online and can be accessed directly by governments, public institutions and consumers.

Table 2-2. OSD functions

OSD Icon on Main Menu	Sub menu	Option	Note
Monitor Control	Brightness	0-100	Adjusts the overall brightness.
	Color mode	sRGB	Select the color mode.
		BT.709	Red: Increases or decreases the saturation of 'red' in the image.
		Neutral	Green: Increases or decreases the saturation of 'green' in the image.
		Warm	Blue: Increases or decreases the saturation of 'blue' in the image.
		Cool	Note: This function will be grayed out and unselectable. When the Scenario mode is set to E-BOOK mode.
		Custom	
	Contrast	0-100	Adjusts the contrast ratio. Note: This function will be grayed out and unavailable in sRGB/BT.709/E-BOOK mode.
	Dynamic contrast	On	When enabled, the monitor automatically assesses the overall brightness of the image and restores various color levels by reducing brightness in darker areas. This enhancement produces a clearer and more distinct image.
		Off	Note: When the Dynamic contrast is turn on, Brightness/Contrast/Color mode must be grayed out and cannot be selected.
	Over Drive	Off	Over drive improves a monitor's GtG (Grey-to-Grey) response time, a critical metric for assessing the responsiveness of a monitor. A shorter GtG time facilitates quicker screen transitions, resulting in smoother and clearer motion visuals. Note: This function will be grayed out and unavailable once the HDR signal comes in.
		Normal	
		Extreme	
	Aspect ratio	Full Screen	Adjusts the ratio of the horizontal to vertical dimensions of the display image on the monitor, relative to the resolution signal transmitted by the device.
		Original AR	Note: This function will be grayed out and unavailable when the Panel resolution is a geometric Multiple of the Input signal resolution.
	Button repeat rate	Default	Select the response speed of the button.
		Slow	
		Off	
	LED indicator	On/Off	When disabled, the LED remains off when the monitor is powered on.
	Power button lock	On/Off	When enabled, the power button is locked to prevent accidental pressing.

OSD Icon on Main Menu	Sub menu	Option	Note
Quick settings	Right key	Brightness	Assigns the shortcut keys to user preferences. Options include Brightness, Color mode, Contrast, Scenario Mode and Language.
	Down key	Color mode	
	Up key	Contrast Scenario mode Language	
Port settings	Input Signal	Auto	Selects the input signal.
		DisplayPort	
		HDMI	
		VGA	
	USB always On	On / Off	Please refer to Table 2-3 below for specific details.
	Video range	Auto	The video range refers to the standard color spectrum of a video, specifically the value range of the Y component (brightness component) in a digital video signal. This feature processes the input HDMI signal and is available exclusively via HDMI.
		Full range 0-255	
		Limited range 16-235	
Advanced settings	Scenario mode	Panel native	Select the scenario mode.
		Image creation (default sRGB)	
		Video creation (default BT.709)	
		E-Book mode	
	Conference/Meeting indicator	Auto/On/Off	The indicator at the top of the display lights up to notify others that you are currently occupied. Auto: when the camera is activated or the headset is plugged in, the top indicator lights up.
	Image Position	Horizontal position/ Vertical position	Adjust horizontal/vertical screen positioning under VGA signal input.
	Image Setup	Automatic Manual(Clock / Phase)	In VGA mode, select Automatic to apply the recommended Position, Clock, and Phase settings. This will display the image in full screen if the input pattern is full. If the pattern is not full, adjust the Clock parameter manually.
	Video/Audio Icon	On/Off	
Smart Feature	Smart face framing	On	Digital zoom ensures that the face remains in the middle.
		Off	
	Smart Audio	On	When this function is enabled, the microphone prioritizes capturing sound in front of the monitor. Speech outside the capture area is significantly suppressed, but not completely eliminated.
		Off	

OSD Icon on Main Menu	Sub menu	Option	Note
Menu settings	Information	Model name Refresh Rate Firmware Serial number	Display the main information of the model.
	Language	English/ 简体中文 / 繁體中文 / 日本語 /Français/ Italiano/Español/ Deutsch/Русский/ ไทย/Українська	Change the language of the OSD menu. Note: The selected language only affects the language of the OSD. It has no effect on any software running on the computer.
	OSD rotation	Normal 90 180 270	Adjust the rotation of OSD.
	OSD position	0~100 (H,V)	Adjust the position of OSD.
	OSD timeout	5~115	Set time of the OSD will remain active after the last time a button is pressed.
	Transparency	0 ~100	Adjust the transparency of OSD.
	Factory reset	Reset	Resets monitor to the original factory settings. The ENERGY STAR logo indicates resetting all user settings to default values to ensure the monitor can meet Energy Star requirements.
No			

*The use of Extreme Mode (response time) may result in reduced display quality when fast moving video graphics are displayed.
Users should check Extreme Mode (response time) to verify if it is compatible with any applications they would like to use it with.

Table 2-3 for "USB always On"

OSD option "USB always On"		On		Off(Default)	
Upstream status		Connected	Unconnected	Connected	Unconnected
Monitor DC On mode	Power Delivery (upstream)	Enable	N/A	Enable	N/A
	USB Data (downstream)	Enable	N/A	Enable	N/A
	USB charge (downstream)	Enable	Enable	Enable	Disable
	LAN	Enable	N/A	Enable	N/A
Monitor standby mode	Power Delivery (upstream)	Enable	N/A	Enable	N/A
	USB Data (downstream)	Enable	N/A	Enable	N/A
	USB charge (downstream)	Enable	Enable	Enable	Disable
	LAN	Enable	N/A	Enable	N/A
Monitor DC Off mode	Power Delivery (upstream)	Enable	N/A	Disable	N/A
	USB Data (downstream)	Enable	N/A	Disable	N/A
	USB charge (downstream)	Enable	Enable	Disable	Disable
	LAN	Enable	N/A	Disable	N/A

Smart Feature

This section describes how to use the Smart Features of this monitor.

Conference/Meeting indicator

1. There are On/Off/Auto modes for the light.
2. Press the down key for 3 seconds can easily switch On/Off.
3. The traffic light indicate the monitor working status of camera and microphone at "Auto" mode.

Press the Menu key to access the OSD menu, select **Advanced settings** to access the sub-menu of the next level, and then select the **Conference/Meeting indicator** option to access the function interface, as shown in the following figure OSD menu:

Note: Using this feature requires you to connect your monitor to your computer with USB A-B cable.

Smart face framing

When the function is turned on and person's faces are not in the center of the camera, this monitor will use digital zoom to keep person's face in the center of the screen.

Press the Menu key to access the OSD menu, select **Smart Feature** to access the sub-menu of the next level, and then select the **Smart face framing** option to access the function interface, as shown in the following figure OSD menu:

Note:

1. Using this feature requires you to connect your monitor to your computer with USB A-B cable.
2. If it's too close to the border. The camera cannot focus successfully. So the image may not be centered
3. If the character is constantly moving fast, the camera may not work because of a focus failure.
4. If there are multiple faces in the picture, the camera will select some faces for zoom amplification according to the algorithm, and you can readjust the position facing the display screen to meet the use expectations.
5. Check your CPU of NB/PC to keep high efficiency (Please use adapter instead of internal Battery when using NB).
6. Sometimes you might find the face can be enlarged, not be centralized when your face is in the edge of the image that camera captured, please move your face close to centre.
7. Only supports cameras that come with Windows 10 or Windows 11 systems.

Smart Audio

Off: No sound suppression around the microphone.

On: Microphone mainly catch the sound of the front area.

The speech out of catching area will be suppressed obviously but not disappear totally.

Press the Menu key to access the OSD menu, select **Smart Feature** to access the sub-menu of the next level, and then select the **Smart Audio** option to access the function interface, as shown in the following figure OSD menu:

Note:

1. To connect USB A-B cable to enable the function.
2. The environment, sound reflection or noise volume, will impact the function quality.
3. Using this feature requires you to connect your monitor to your computer with A USB A-B cable
4. The environment, sound reflection or noise volume, will impact the function quality.
5. It should be operated within the effective range of the Camera microphone.
6. If the character is always moving quickly, the Camera microphone may not work because the range of the radio is not timely

Video/Audio Icon on/off

Connect USB cable from PC/NB to Monitor, set Advanced Settings->Video/Audio Icon on, Video/Audio ICON will display on left bottom when Camera / Microphone is enable.

Selecting a supported display mode

The display mode of the monitor uses is controlled by the computer. Therefore, refer to your computer documentation on how to change display modes.

The image size, position and shape might be changed when the display mode changes. This is normal and the image can be re-adjusted using automatic image setup and the image controls. Unlike CRT monitors, which require a high refresh rate to minimize flicker, LCD or Flat Panel technology is inherently flicker-free.

Note: If your system has previously been used with a CRT monitor and is currently configured to a display mode outside the range of this monitor, you may need to reattach the CRT monitor temporarily until you have re-configured the system; preferably to :1920 x 1080 at 60 Hz, which is a common display mode.

The display modes shown below have been optimized at the factory.

Note: According to the VESA standard, there may be a certain error (+/-1Hz) when calculating the refresh rate (field frequency) of different operating systems and graphics cards. In order to improve compatibility, the nominal refresh rate of this product has been rounded off. Please refer to the actual product.

Table 2-4 Factory set display modes

Address ability	Refresh rate
640 x 480	60 Hz, 67 Hz, 72 Hz
720 x 400	70 Hz
800 x 600	60 Hz, 72 Hz, 75 Hz
832 x 624	75 Hz
1024 x 768	60 Hz, 70 Hz, 75 Hz
1280 x 1024	60 Hz, 75 Hz
1366 x 768 (only DP, HDMI)	60 Hz

720p	50 Hz, 60 Hz
1080p	50 Hz, 60 Hz, 100 Hz, 120 Hz

Understanding power management

Power management is invoked when the computer recognizes that you have not using your mouse or keyboard for a user-definable period. There are several states as described in the table below.

For optimal performance, switch off your monitor at the end of each working day, or whenever you expect to leave it unused for long periods during the day.

Table 2-5. Power indicator

State	Power Indicator	Screen	Restoring Operation	Compliance
On	White	Normal		
Standby/ Suspend	Amber	Blank	Press a key or move the mouse. There may be a slight delay reappears. Note: Standby also occurs if there is no image output to the monitor.	ENERGY STAR
Off	Off	Blank	Press power key to switch on There may be a slight delay before the image reappears.	ENERGY STAR

Power Management Modes

VESA Modes	Horizontal Sync	Vertical Sync	Video	Power Indicator	Power Consumption
Normal operation	Active	Active	Active	White	64 W (maximum)* 14 W (typical)
Active-off mode	Inactive	Inactive	Off	Amber	Less than 0.5 W
Switch off	-	-	-	Off	Less than 0.3 W

Energy Star	Power Consumption
P _{ON}	12.6 W
E _{TEC}	40 kWh

**** Maximum power consumption with max luminance.**

This document is informational only and reflects laboratory performance. Your product may perform differently, depending on the software, components and peripherals you ordered and shall have no obligation to update such information. Accordingly, the customer should not rely upon this information in making decisions about electrical tolerances or otherwise. No warranty as to accuracy or completeness is expressed or implied.

Caring for your monitor

Be sure to turn off the power before you perform any maintenance on the monitor.

Do not:

- Apply water or liquid directly to your monitor.
- Use solvents or abrasives.
- Use flammable cleaning materials to clean your monitor or any other electrical equipment.
- Touch the screen area of your monitor with sharp or abrasive items. This type of contact may cause permanent damage to your screen.
- Use any cleaner which contains an anti-static solution or similar additives. This may harm the coating of the screen area.

Do:

- Lightly dampen a soft cloth with water and use this to gently wipe the covers and the screen.
- Remove grease or finger marks with a damp cloth and a little mild detergent.

Detaching the monitor base and stand

Step 1: Place the monitor on a soft and flat surface.

Step 2: Press and hold the stand release button.

Step 3: Lift the stand up and away from the monitor.

Wall Mounting (Optional)

Refer to the instructions that come with the base mounting kit. To convert your LCD display from a desk-mounted to a wall-mounted display, do the following:

Step 1: Verify that the Power button is turned Off, then disconnect the power cord.

Step 2: Lay the LCD display face down on a towel or blanket.

Step 3: Remove the base from the monitor, refer to “Detaching the monitor base and stand”.

Step 4: Attach the mounting bracket from the VESA compatible wall mounting kit (100mm x100mm distance), VESA Mounting Screw M4 x 10 mm.

Step 5: Attach the LCD display to the wall, and follow the instructions in the wall-mounting kit.
For use only with UL Listed Wall Mount Bracket with minimum weight/load: 8.8kg

Chapter 3.Reference information

This section contains monitor specifications, instructions to manually install the monitor driver, troubleshooting information.

Monitor specifications

Table 3-1. Monitor specifications for type-model T24-4v/64B6MAR1WW

Dimensions	Depth	190.0 mm (7.48 in.)
	Height	540.2 mm (21.27 in.)
	Width	539.8 mm (21.25 in.)
Stand	Lift	155 mm
	Tilt	-5° to 23.5°
	Swivel	-45° to 45°
	Pivot	-90° to 90°
VESA mount	Supported	100 mm x 100 mm (3.94 in. x 3.94 in.)
Image	Viewable image size	60.5 cm (23.8 in.)
	Maximum height	296.5 mm (11.67 in.)
	Maximum width	527.0 mm (20.75 in.)
	Pixel pitch	0.2745 mm (0.01 in.)
Power input	Supply voltage	100-240V AC
	Max supply current	1.5A
Power consumption Note: Power consumption figures are for the monitor and the power supply combined. Note: Typical power consumption is tested under OSD default setting.	Normal operation	<64 W (Max) <14 W (Typical)
	Standby/Suspend	<0.5 W
	Off	<0.3 W at 100VAC and 240VAC
Video input (DP) Interface	Interface	DP
	Input signal	VESA TMDS (Panel Link™)
	Horizontal addressability	1920 pixels (Max)
	Vertical addressability	1080 lines (Max)
	Clock frequency	300 MHz (Max)

Video input (HDMI)	Interface	HDMI
	Input signal	VESA TMDS (Panel Link™)
	Horizontal addressability	1920 pixels (Max)
	Vertical addressability	1080 lines (Max)
	Clock frequency	300 MHz (Max)
Video input (Analog)	Interface	VGA
	Input signal	VESA TMDS (Panel Link™)
	Horizontal addressability	1920 pixels (Max)
	Vertical addressability	1080 lines (Max)
	Clock frequency	210 MHz (Max)
Communications	VESA DDC/CI	
Supported Display Modes	Horizontal frequency	Analog: 28 kHz-90 kHz HDMI: 28 kHz-150 kHz DP: 28 kHz-150 kHz
	Vertical frequency	Analog: 48 Hz-76 Hz HDMI/DP: 48 Hz-120 Hz
	Native Resolution	1920 x 1080@ 60 Hz
Temperature	Operating	0° to 40°C (32°F to 104° F)
	Storage	-20° to 60°C (-4° F to 140° F)
	Shipping	-20° to 60°C (-4° F to 140° F)
Humidity	Operating	10% to 80% non-condensing
	Storage	5% to 95% non-condensing
	Shipping	5% to 95% non-condensing

Troubleshooting

If you have a problem setting up or using your monitor, you might be able to solve it yourself. Before calling your dealer or Lenovo, try the suggested actions that are appropriate to your problem.

Table 3-2. Troubleshooting

Problem	Possible cause	Suggested action	Reference
The words "Input not supported" are shown on the screen, and the power indicator is flashing white.	The system is set to a display mode which is not supported by the monitor	• If you are replacing an old monitor, reconnect it and adjust the display mode to within the specified range for your new monitor. • If using a Windows system, restart the system in safe mode, then select a supported display mode for your computer. • If these options do not work, contact the Customer Support Center.	"Selecting a supported display mode" on page 2-9
The image quality is unacceptable	The video signal cable is not connected with the monitor or system completely.	Be sure the signal cable is firmly plugged into the system and monitor.	"Connecting and turning on your monitor" on page 1-8
	The color settings may be incorrect.	Select another color setting from the OSD menu.	"Adjusting your monitor image" on page 2-3
	The automatic image setup function was not performed.	Perform automatic image setup.	"Adjusting your monitor image" on page 2-3
The power indicator is not lit and there is no image.	• The monitor's power switch is not switched on. • The power cord is loose or disconnected. • There is no power at the outlet.	• Be sure the power cord is connected properly. • Be sure the outlet has power. • Power on the monitor. • Try using another power cord. • Try using another electrical outlet.	"Connecting and turning on your monitor" on page 1-8
Screen is blank and power indicator is amber.	The monitor is in Standby / Suspend mode	• Press any key on the keyboard or move the mouse to restore operation. • Check the Power options settings on your computer.	"Understanding power management" on page 2-14
The power indicator is amber, but there is no image	The video signal cable is loose or disconnected from the system or monitor	Be sure the video cable is connected with the system properly	"Connecting and turning on your monitor" on page 1-8
	The monitor brightness and contrast are at the lowest setting.	Adjust the brightness and contrast setting on the OSD menu.	"Adjusting your monitor image" on page 2-3
One or more of the pixels appear discolored	This is a characteristic of the LCD technology and is not an LCD defect	If there are more than five pixels missing, contact the Support Center	"Appendix A. Service and Support" on page A-1

Problem	Possible cause	Suggested action	Reference
• Fuzzy lines in text or a blurry image • Horizontal or vertical lines through the image.	• Image setup has not been optimized • Your system DisplayProperties setting have not been optimized.	Adjust the resolution settings on your system to match the native resolution for this monitor: 1920 x 1080 at 60 Hz.	"Adjusting your monitor image"on page 2-3
		Perform automatic image setup. If automatic image setup does not help, perform manual image setup.	"Selecting a supported display mode"on page 2-9
		When working in the native resolution, you may find additional improvements by adjusting the Dots Per Inch (DPI) setting on your system.	See the Advanced section of your system's display properties.

Manually installing the monitor driver

Below are steps for manually installing the monitor driver in Microsoft Windows 10, Microsoft Windows 11.

1. Turn off the computer, all attached devices.
2. Ensure that the monitor is connected correctly.
3. Turn on the monitor and then the system unit. Allow your computer to start the Windows operating system.
4. From the Lenovo website https://pcsupport.lenovo.com/solutions/t24_4v, find the corresponding monitor driver and download it to a PC to which this monitor is connected (such as a desktop).
5. Right-click the Windows **Start** button on the desktop, then click **Device Manager**, and double click **Monitor**.
6. Double-click **Generic Monitor**.
7. Click the **Driver** tab.
8. Click **Update Driver**, and then click **Browse Computer to find the driver**.
9. Click **Let me pick from a list of available drivers on my computer**.
10. Click the **Have Disk...** button. By clicking the **Browse** button, browse and point to the following path: **X:\Monitor Drivers\Windows** (where X indicates “the folder in which the downloaded driver is located” (such as a desktop)).
11. Select **t24-4v.inf** file, Click **Open** button. Click **OK** button.
12. In the new window, select **T24-4v** and click **Next**.
13. After the installation is complete, delete all downloaded files and close all Windows.
14. Restart the system. The system will automatically select the refresh rate and the corresponding color matching profile.

Note: On LCD monitors, unlike CRTs, a faster refresh rate does not improve display quality. Lenovo recommends using either 1920 x 1080 at a refresh rate of 60 Hz, or 640 x 480 at a refresh rate of 60 Hz.

Getting further help

If you still can't solve your problem, please contact the Lenovo Support Center. For more information on contacting the Support Center, please see “Appendix A. Service and Support” on page A-1

Service information

Customer responsibilities

The warranty does not apply to a product which has been damaged due to accident, misuse, abuse, improper installation, usage not in accordance with product specifications and instructions, natural or personal disaster, or unauthorized alterations, repairs or modifications.

The following are examples of misuse or abuse and not covered by warranty:

- Images burned on to the screen of a CRT monitor. Burned image is preventable by utilizing a moving screen saver or power management.
- Physical damage to covers, bezel, base and cables.
- Scratches or punctures on monitor screens.

Service parts

The following parts are for use by Lenovo service, or Lenovo authorized dealers, to support the customer warranty. Parts are for service use only. The table below shows information for model 64B6MAR1WW.

Table 3-3. Repair parts list

FRU (FIELD REPLACEABLE UNIT) PART NUMBER	Description	Machine Type/ Model (MTM)	Color
5C11J07491	HDMI2.0 cable 1.8m FRU--TPV	64B6	Raven Black
5C11P37227	USB Type-A to B cable 1.8m-TPV	64B6	Raven Black
5CF1S60146	T24-4v- FRU Carton	64B6	Raven Black
5D11P36235	T24-4v - 23.8 inch FRU Monitor	64B6	Raven Black
5SE1P38240	T24-4v - FRU Stand and Base	64B6	Raven Black

Appendix A. Service and Support

The following information describes the technical support that is available for your product, during the warranty period or throughout the life of the product. Refer to the Lenovo Limited Warranty for a full explanation of Lenovo warranty terms.

Registering your option

Register to receive product service and support updates, as well as free and discounted computer accessories and content. Go to:
<http://www.lenovo.com/register>

Online technical support

Online technical support is available during the lifetime of a product at:
<http://www.lenovo.com/support>

Product replacement assistance or exchange of defective components also is available during the warranty period. In addition, if your option is installed in a Lenovo computer, you might be entitled to service at your location. A Lenovo technical support representative can help you determine the best alternative.

Telephone technical support

Installation and configuration support through the Customer Support Center will be available until 90 days after the option has been withdrawn from marketing. After that time, the support is cancelled, or made available for a fee, at Lenovo's discretion. Additional support is also available for a nominal fee.

Before contacting a Lenovo technical support representative, please have the following information available: option name and number, proof of purchase, computer manufacturer, model, serial number and manual, the exact wording of any error message, description of the problem, and the hardware and software configuration information for your system.

Your technical support representative might want to walk you through the problem while you are at your computer during the call.

Telephone numbers are subject to change without notice. The most up-to-date telephone list for Lenovo Support is always available at:

Recycling information

Lenovo encourages owners of information technology (IT) equipment to responsibly recycle their equipment when it is no longer needed. Lenovo offers a variety of programs and services to assist equipment owners in recycling their IT products. For information on recycling Lenovo products, go to:

<http://www.lenovo.com/recycling>

環境配慮に関して

本機器またはモニターの回収リサイクルについて

企業のお客様が、本機器が使用済みとなり廃棄される場合は、資源有効利用促進法の規定により、産業廃棄物として、地域を管轄する県知事あるいは、政令市長の許可を持った産業廃棄物処理業者に適正処理を委託する必要があります。また、弊社では資源有効利用促進法に基づき使用済みパソコンの回収および再利用・再資源化を行う「PC 回収リサイクル・サービス」を提供しています。詳細は、https://www.lenovo.com/jp/ja/services_warranty/recycle/pcrecycle/をご参照ください。

また、同法により、家庭で使用済みとなったパソコンのメーカー等による回収再資源化が 2003 年 10 月 1 日よりスタートしました。詳細は、https://www.lenovo.com/jp/ja/services_warranty/recycle/pcrecycle/をご参照ください。

重金属を含む内部部品の廃棄処理について

本機器のプリント基板等には微量の重金属（鉛など）が使用されています。使用後は適切な処理を行うため、上記「本機器またはモニターの回収リサイクルについて」に従って廃棄してください。

Collecting and recycling a disused Lenovo computer or monitor

If you are a company employee and need to dispose of a Lenovo computer or monitor that is the property of the company, you must do so in accordance with the Law for Promotion of Effective Utilization of Resources. Computers and monitors are categorized as industrial waste and should be properly disposed of by an industrial waste disposal contractor certified by a local government. In accordance with the Law for Promotion of Effective Utilization of Resources, Lenovo Japan provides, through its PC Collecting and Recycling Services, for the collecting, reuse, and recycling of disused computers and monitors. For details, visit the Lenovo Web site at

https://www.lenovo.com/jp/ja/services_warranty/recycle/pcrecycle/. Pursuant to the Law for Promotion of Effective Utilization of Resources, the collecting and recycling of home-used computers and monitors by the manufacturer was begun on October 1, 2003. This service is provided free of charge for home-used computers sold after October 1, 2003. For details, visit the Lenovo Web site at https://www.lenovo.com/jp/ja/services_warranty/recycle/personal/.

Disposing of Lenovo computer components

Some Lenovo computer products sold in Japan may have components that contain heavy metals or other environmental sensitive substances. To properly dispose of disused components, such as a printed circuit board or drive, use the methods described above for collecting and recycling a disused computer or monitor.

Trademarks

The following terms are trademarks of Lenovo in the United States, other countries, or both:

- Lenovo
- The Lenovo logo
- ThinkCentre
- ThinkPad
- ThinkVision

Microsoft, Windows, and Windows NT are trademarks of the Microsoft group of companies.

Other company, product, or service names may be trademarks or service marks of others.

Power cords and power adapters

Use only the power cords and power adapters supplied by the product manufacturer. Do not use the AC power cord for other devices.
