¹ One Gigabyte (1GB) means 10⁹ = 1,000,000,000 bytes and One Terabyte (1TB) means 10¹² = 1,000,000,000,000 bytes using powers of 10. A computer operating system, however, reports storage capacity using powers of 2 for the definition of 1GB= 2³⁰ = 1,073,741,824 bytes and 1TB = 2⁴⁰ = 1,099,511,627,776 bytes, and therefore shows less storage capacity. Available storage capacity (including examples of various media files) will vary based on file size, formatting, settings, software and operating system and other factors.

² Two (2) year standard limited warranty applies. The warranty brochure is preloaded on the hard drive or can be viewed online at: <http://storage.toshiba.com/consumer-hdd/support/warranty-info>.

³ Product prices, specifications, configurations, colors, components, features, and availability are subject to change without notice.

⁴ Compatibility may vary depending on user's hardware configuration and operating system. Formatted exFAT. Reformatting may be required for some operating systems. Please check device compatibility and connecting instructions by reviewing the applicable user manuals for such device. The latest information can be viewed online at https://www.canvio.jp/en/compati/hdd/ot_ehdd/game/index.htm Compatibility is based on information currently available and is subject to change and subject to restrictions per hardware specifications.

⁵ Estimated game storage is based on assumption of average game size of 36 GB for current generation games. The number of games actually stored may vary depending on file size, formatting, console software, and other programs or factors. Original discs may be required to verify ownership for games purchased and loaded from disc. Internet connection and original game owner's account may be required.
