

# Dell carrying cases durability

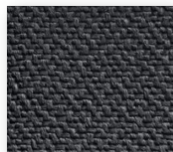

Dell carrying cases are designed with both durability and protection in mind. Each bag is crafted to withstand daily use and provide superior protection for your laptop and essentials. Find out more about the three key features that set our carrying cases apart.

## Fabric selection

We only use high tensile strength fibers/yarns and high-density weaving technique, including Jacquard, Dobby and Ripstop patterns to create durable bags.

These fabrics, with their unique characteristics provide balance aesthetic, weight and performance needed in our portfolio.

### PREMIER JACQUARD<sup>1</sup>

*Sophisticated look, excellent durability*

Intricate patterns created through a unique weave structure provide distinctive aesthetics and exceptional resistance to surface abrasion.

### PRO DOBBY<sup>1</sup>

*Subtle texture, robust effect*

Tightly woven fabric with a small geometric pattern offers a timeless look with high-density durability and strength.

### PRO RIPSTOP<sup>1</sup>

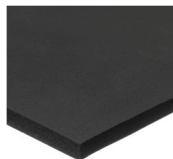

*Lightweight, enduring performance*

Lightweight fabric with interwoven reinforcement threads at regular intervals, making it highly resistant to wear and tear.

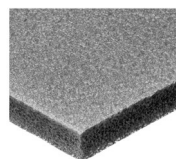

## Foam protection

All Dell carrying cases come with 360° high density foam protection, ensuring every exterior panel safeguards your devices.

XPE foam

EVA foam

Selected models use **EVA and XPE** foam for shape retention, excellent shock absorption, and resilience.

Additionally, some models have an extra **top bumper** in the laptop compartment for added impact protection, reducing the risk of damage during travel.

## Testing standards

Dell carrying cases come with a 3-year limited warranty and undergo over 50 rigorous quality tests including humidity chamber, global ASTM and AATCC standards, covering color fastness, water resistance, tear strength, abrasion resistance, and strap and zipper strength.
