

Trusted by more than 5.5 million users worldwide

But don't take our word for it — See what these satisfied users had to say:

Acronis software makes moving data a breeze from hardware device to hardware device. It does so offering a simplified interface that even I can understand. Few products are worth the renewal, but without question, Acronis is one of those products.

— Brent B.

Acronis True Image is excellent software because it always works, always does what it says it will do, and is completely trustworthy software. I use Acronis to clone my hard disk drives every month and it never fails to do an excellent job.

— Russel W.

I had a hardware failure and was not able to access my documents or photos. Acronis True Image saved my life as I was able to recover quickly.

— Jeff H.

Acronis is a very strong application for protecting your computers. Plus their tech support is top notch. I recommend Acronis every time someone asks me what I use.

— Joe D.

Be protected from the unexpected

Easy, flexible, secure backup

Protect everything — photos, files, applications, operating systems and the devices they're on — through one intuitive interface that's accessible from anywhere.

Efficient all-in-one protection

Enjoy peace of mind with the only personal solution that integrates cybersecurity and fast data backup — eliminating the cost and complexity of managing multiple tools.

Secure from all modern cyberthreats

Stop any threat from disrupting your digital life, from disk failure to device loss to the latest cyberattacks — including those never seen before.

Acronis True Image

The #1 personal cyber protection solution

The best cybersecurity
The best secure backup
True cyber protection

acronis.com

Personal and home office data is more valuable than ever and needs protection. Backups without cybersecurity leave you vulnerable, while cybersecurity without backups won't help you recover important files and settings.

Advanced anti-malware and cybersecurity

Cutting-edge behavioral technologies and signature-based defenses work together to protect you from the latest cyberthreats — even those never seen before.

- AI-enhanced protection stops attacks in real time before malware, ransomware and cryptojackers cause damage.
- Identity Protection* to safeguard personal information such as social security numbers. Acronis provides theft reimbursement of up to \$1 million in the event of financial loss.
- Web filtering and videoconference protection keep cyberthreats and intruders away from your valuable data.

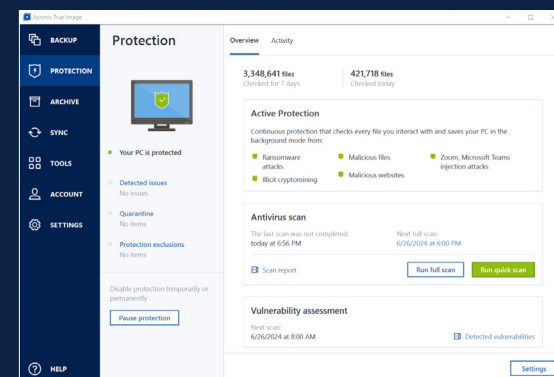

Acronis True Image is the only personal cyber protection solution that keeps your digital world safe from today's threats. When award-winning backup meets advanced cybersecurity, the results can't be beaten — that's the power of integration.

Reliable backup and data protection

Set-and-forget backups and comprehensive data protection ensure you'll never lose precious files or applications — and you can always restore your system in a flash.

- Flexible scheduling helps you back up what you want — from full system images to individual files — to your preferred storage media.
- Recoveries are fast and reliable — restore your entire system with just a few clicks.
- Disk cloning, all-in-one recovery drives, end-to-end encryption, blockchain-based notarization and eSignatures help keep your data accessible and authentic.

Install the language of your choice

Easy and efficient management

Configuring and using multiple (often incompatible) products can be an expensive headache. Save time, money and stress with a single integrated solution purpose-built for all your cyber protection needs.

- Enjoy clear performance advantages — like cloud backups that run up to 13 times faster than other solutions.
- Store backups locally, in the cloud or both, for unbeatable data protection and accessibility.
- Manage everything through a single, intuitive interface that's accessible from anywhere.
